Stranger Suns:

Stranger Suns George Zebrowski, 2014-04-01 The orbiting tachyon detector was designed by physicist Juan O'Brien to identify life in other star systems but even though he expected to find some signs of life he certainly didn't expect to find any life on Earth. When O'Brien discovers that a culture has been concealed for many years far below Antarctica he ventures out as part of a four-man team to explore the unknown. Juan, Lena, Malachi, and Magnus are awestruck when they discover a myriad of portals to parallel lands but the maze they fall into makes them wonder if their journey will ever come to an end.
