Stranger Than Science:

Stranger Than Science Frank Edwards, 1992-05-01 Presents accounts of true and unusual incidents that are unable to be explained by modern science *Stranger Than Science Stories and Facts* Martin K. Ettington, I first read the book *Stranger Than Science* By Frank Edwards when I was about 10 years old and it was an important turning point in my life The book has many stories of strange events and it really built my curiosity about the world Later I went to Engineering School and also had many paranormal experiences from learning meditation and other practices I have now researched and written over 100 books on strange and mysterious phenomena My fascination with strange things has become a major passion in my life This book is kind of an updated version of that famous Frank Edwards book based on my experiences and research of many phenomena I m sure you will find the stories in this book fascinating since they are all samples of much of what I experienced researched and have written about It contains over 32 chapters of my favorite stories on various topics to provide a question mark for your beliefs and assumptions about the world and universe we live in When you finish this volume maybe you will see my point of view which is that as much as we think we know about this world and the universe there are still many mysteries and strange things out there **Stranger Than Science Stories and Facts-Volume Two** Martin K

Ettington, 2022-03-30 This book is my second on stranger than science stories and facts The idea is from the book *Stranger Than Science* by Frank Edwards that I read when I was a kid It made a great impression on me since it caused me to be curious about all of the unknown facts in the world In this Volume Two I ve gone through my 120 plus books again to find interesting subjects I ve either experienced or researched which were not discussed in the first book My goal is to open the eyes of the reader to facts and stories about the unknown they may not know about Hopefully this will lead you to become more open minded and think seriously about new things which may not have been part of your life before Here you will read stories about the Paranormal Spiritual Enlightenment Legendary animals like Dragons giant snakes living dinosaurs ball lightning alien anti gravity technology improving longevity and much more I promise you will not be bored with the materials we cover here After reading this book I hope you can see that our world is truly mysterious and the more we know the more questions we have and the more there is to know *Stranger Than Science Stories and Facts* Ettington Martin

(author), 1901 *Accepted Science & Paradigms Which Are Likely Wrong* Martin K. Ettington, As an engineer and student of science I try to keep up with publications of the latest discoveries and paradigm shifts in science around the world I believe that there are several big problems with science today First is that much science is biased which might be because some scientists want to keep their point of view prominent and the others because many focuses of science are supported by biased funding This will be discussed in this book The other issue is that many scientists limit their thinking to only support age old paradigms and refuse to accept changes to their theories or throw out evidence because it doesn t conform their current beliefs In this book we will cover many issues such as the belief among many cosmologists that the Big Bang never

happened We will also look at ideas we thought settled but which have lots of contrary evidence and anecdotal counter stories such as time travel and dimensional crossings After you read this book you may question much of what is commonly accepted by scientists in the world today The Fortean Influence on Science Fiction Tanner F. Boyle, 2020-12-23 Charles Fort was an American researcher from the early twentieth century who cataloged reports of unexplained phenomena he found in newspapers and science journals A minor bestseller with a cult appeal Fort's work was posthumously republished in the pulp science fiction magazine *Astounding Stories* in 1934 His idiosyncratic books fascinated, scared and entertained readers many of them authors and editors of science fiction Fort's work prophesied the paranormal mainstays of SF literature to come UFOs poltergeists strange disappearances cryptids ancient mysteries unexplained natural phenomena and everything in between Science fiction authors latched on to Fort's topics and hypotheses as perfect fodder for SF stories Writers like Arthur C. Clarke, Philip K. Dick, Robert Heinlein, H. P. Lovecraft and others are examined in this exploration of Fortean science fiction, a genre that borrows from the reports and ideas of Fort and others who saw the possible science fictional nature of our reality **Strange Tales from National Parks** Martin K. Ettington, National Parks here and abroad have an unusual number of strange, scary and weird activities going on It may be because these areas cover some of the most hidden and still natural and undisturbed locations in the world These parks offer undisturbed areas where man does not intrude normally and many activities can be hidden there The stories in this book are mostly by Park Rangers who spent years in the outback of these parks and tell of their unusual and sometimes very scary experiences I've divided up these stories mainly by types like missing persons, Bigfoot sightings, Aliens and UFOs and more Some experiences are so weird or unusual they were hard to categorize so they are in the chapter titled Random Stories From my own experiences camping the wilderness I know that you need to be prepared for the unexpected All of these stories were reported as true but who is to say what the real truth is Radionics and Life Force Technologies Martin K. Ettington, Radionics is the term for machines which manipulate life forces This is often for healing or increasing psychic perceptions The Author is an engineer and has many decades of experience with the paranormal and well as time learning and experimenting with radionics devices from the 1970s While radionics devices are often considered pseudoscience those opinions don't take into account the sensitivities of individuals who have incredible paranormal and healing abilities In my first year of engineering school at Rensselaer Polytechnic Institute in Troy, New York I met a man who became my mentor in the Paranormal and other things too This was in 1973 I learned to meditate and how to open my crown chakra to take in vital forces which allowed me to do many things including healing others In addition I also met another middle-aged guy at a Psychic Fair in Saratoga Springs, New York He was a researcher in the arcane field of Kirlian Photography In this book the history of radionics is discussed, some of the major influencers on that history, how these devices are used for healing and even some plans for building radionics devices My hope is that this book will give you a good grounding in radionics to learn to use it productively for your own efforts

Creating Your Own Reality Martin K. Ettington, There are a lot of books written on the topic of visualization Mine is a little different As an engineer and experimenter of many paranormal events I've got a different perspective enabled by my research and experience There are many subjects I've studied that indicate that the mind really can affect our reality In this book I will review why my research and experience says that visualization really works and some lessons on how to do it The Reality we live in is much more malleable than we think and so why not set our goals and purposes to get that reality to work the way we want it Techniques included in this book include various visualization techniques and building your own vision board

The Immortals of the Interstellar Colony Martin K. Ettington, In Part I we learn the story of a young man who lost hope then found it again He learned how to change his life and found a new mission and goals which excited him This led him to a career in space manufacturing which evolved into a project building Habitats in Space There have been a lot of discussions about Space Habitats but how would you actually build one and what technical and personal issues would arise in the process Read about a personal rise from ashes hope and the potential for creating a new wonderful world to live in which is literally out of this world Part II is about converting the Habitats to an interstellar spaceship to settle a new planet It is a long journey with major dangers along the way A generational ship with long lived residents And what new abilities would people develop on a long journey to the stars Follow this adventure to learn the realistic challenges of an Interstellar Journey

The Ancient Underground Wall in Rockwall, Texas Martin K. Ettington, The underground rock wall in Rockwall Texas has fascinated me for years I've read everything I could online about it Recently I moved from Los Angeles to Denton Texas which is only about an hour drive from Rockwall So I went there and spent an hour with the Rockwall County Museum Curator and learned a lot more about the structure Was also able to examine and take pictures of the wall section moved from the actual wall and reconstructed outside the museum In this book I've related the history of the wall's discovery excavations interesting items and structures found on or near the wall and information about possible giants who might have built it There are a lot of unanswered questions about this structure which still need to be learned Those questions are listed near the end of this book

The Spiritual Enlightenment of an Engineer Martin K. Ettington, I've written quite a few books about spirituality and my experiences and beliefs in our abilities to expand our consciousness through spiritual development practices meditation and the paranormal This book includes my experiences with paranormal abilities acquired from the spiritual development process and different enlightenment experiences Having been raised in a technical family and gone to engineering school my perspective is pretty unique since I developed both traditional technical knowledge of the world while I was also going through the spiritual development and enlightenment process There are many engineers and scientists who are also religious but I've found that technical people who are as deeply into spiritual enlightenment practices and paranormal experiences are pretty rare What I've found is that this dual background has given me more clarity about the world we live in and better objectivity in many cases regarding strange or unusual phenomena The theme of this book is to

review how I went through this dual track system of learning in my life to become both a traditional engineer and to have fairly adept knowledge of spiritual and paranormal experiences *Building Hope and Wonder Among Chaos* Martin K. Ettington, This book provides thirty days of ideas to build your hope and to allow you to develop a sense of wonder about the world we live in I ve written over one hundred books on a variety of topics from the paranormal to self help books survival and much more I also occasionally get premonitions about danger and many other events in my life Recently I received an intuition to write about Hope After meditating on this topic I realized that this is a big concern of many people in our chaotic world With the Pandemic violence inflation and general stress of our world we all need new insight into having Hope in our lives Interestingly many of the topics I ve researched and written about can also provide hope and new paradigms for people The more I ve experienced researched and written on many different Out of the Box topics the more I ve achieved a state of amazement and wonder about our Universe We live in a truly amazing Universe and realizing this deeply will help our attitudes about our lives **18 Long Lived Communities around the World** Martin K. Ettington, This book is about communities and cities around the world where people live to very old ages It is divided into two groups Those communities who have the longest lived peoples in the world Lots of lifestyle and diet data is included for them The second group are another set of communities which have high average ages which people live to but are not quite the outliers that the first group is I ve also tried to provide some general lifestyle and diet guidelines to give an idea of why these places are different for longevity purposes The first four communities were also profiled in my book *Diets and Lifestyles of the World s Oldest Peoples* 32 Longevity Recipes which goes into lot of details about these four locations including traditional recipes Overall I think you will get a better idea of what the reasons are why people live a long time in these locations around the world which may give you ideas about adapting your lifestyle and diets to have maximum longevity **The Microscopic World Inside and Around Us** Martin K. Ettington, We live surrounded by an invisible world which affects our lives in many ways In this book we will take a journey from barely visible life to cells their structures molecules atoms fundamental particles and even smaller We will explore not just the facts about this small world but also try to unearth interesting facts to ponder too For example what did paranormal investigators believe about the structure of atoms over one hundred years ago And what particles or forces might be smaller than the standard building block particles we know about today Also what are the limitations of the standard model of subatomic particles There are many things in the microscopic world which you might not expect The journey from the small to the infinitely small starts here *The Suppression of Truth in the United States and the World* Martin K. Ettington, In today s world we live in a culture of truth suppression This is true in representative democracies like the United States as well as full totalitarian dictatorships like Communist China This book covers many areas of major lies like Global Warming perverted doctrines taught in schools Politics News Suppression Communist China limitations in Spirituality deficit spending and problems with globalism There are many different types of truth suppression

and as much as we would like to think that we live in an advanced culture and world this effort by different entities to suppress truth affects our lives negatively in many ways The most direct effect is that we live in fear of the future of our world which is a big lie This suppression also keeps us from fully realizing our spiritual natures and that we do have the ability to accomplish amazing things when we live with full honesty in our lives I believe that individuals are closest to a state of happiness when they live their lives in truth See my book *A New Paradigm of Truth and Happiness* for more information There are actions we can take to correct this situation but they are mass actions which need many persons involved to have a real effect A list of these actions are given later in this book

Important Prophecies of the Future Martin K. Ettington, There are many Prophecies and Premonitions from the past which still might happen This book looks at the most important from a variety of sources and attempts to analyze what will really happen and when Being an Engineer and a Clairvoyant has led me to analyze my prophecy experiences and given me a better understanding of how they exist and work My major experiences are reviewed in Chapter 2 0 along with my explanations of how prophecy really works In the rest of this book we will explore many prophecies from the past which have yet to occur as well as forecasts by current prophets and great thinkers about our future Then we get into a few prophecies by those who had Near Death Experiences NDEs who are therefore closer to their spirit which increases prophetic validity Next I make a few of my own prophecies about our future from looking ahead with my intuition to see what feels right Lastly is an analysis of the prophecies in this book and what we can learn from them

The Importance of Genius in our World Martin K. Ettington, 2022-07-15 Genius is a fascinating subject which I ve thought a lot about over my life There are many books on the subject and they are all different with various viewpoints on what Genius is who are geniuses and why Genius is important No two definitions of Genius are the same In this book I attempt to cover the history of Genius why it is important famous Geniuses in history and how you can develop a genius consciousness yourself Possibly the earliest Genius of humanity was the person who first learned how to use fire which has been an important part of our ancestors and humanity s survival for over one million years Many geniuses over history contributed to the development of human technology science art war and much more I ve listed many well known geniuses in this book but most are male The problem is that during most of history females were not taken seriously or even allowed to be leaders in the major professions otherwise more would listed as geniuses too

A Guide to Longevity Foods, Diets, and Supplements Martin K. Ettington, There is great interest out there in what people can do to improve their longevity I ve been writing books about longevity for fourteen years and I realized there was one topic I had not really covered in detail That topic is what are the foods and supplements we can take which will help make us healthy enough to lengthen our lives Improving individual longevity is not just about foods and supplements There are a lot of factors which all affect longevity so I have a chapter here which talks about my work *The 10 Principles of Personal Longevity* which covers those issues in more detail In addition there are some specific physical issues like telomeres inflammation and oxidative

stress which also affect chronic diseases and therefore longevity and these are discussed in detail I also think it is pertinent to see what long lived communities eat so I ve copied some of the key data and conclusions from my book on four long lived communities around the world to see what their diets are Some recipes of their traditional foods are also included Foods and supplements which have been known from historical times and today are discussed in detail for you to learn what the wisdom of the ages and science knows about the correct foods and supplements to eat After reading this book you will have new ideas about the food diets and supplements you can eat to help you live a much longer and healthier life *Types of UFOs Observed in History* Martin K. Ettington, My goal in this book is to show the different types of UFOs reported throughout history and today I m not trying to prove whether these ships are real or not I just thought that given the many thousands of sightings of UFOs there should be some commonalities between the sightings Some of the questions I want to answer include Are there any trends in these sightings Is there an evolution in the design of these vehicles over time Are there some common designs over time Also some of the UFOs sighted are likely fakes or secret projects built by the US government I tried to show that information too Just due to the number of stars in our galaxy I m convinced that Aliens exist and have probably visited our planet thousands or even millions of year in the past in addition to visiting in the present This collection of historical photos drawings and descriptions should provide you with a narrative as to how these sightings have changed over time

Eventually, you will agreed discover a additional experience and exploit by spending more cash. yet when? complete you bow to that you require to get those all needs gone having significantly cash?
