organizations will be better equipped to meet their goals and objectives if the owners and managers adopt a clear business philosophy For many businesses that philosophy will be to increase their share of the market For others it might be about making a difference in the community or about developing new products Sometimes a combination of motives drives the management s strategy In any case strategic management helps the business to keep its sights set on what matters most and to not get distracted by ancillary concerns Strategic management is the art and science of formulating implementing and evaluating cross functional decisions that will enable an organization to achieve its objectives It is the process of specifying the organization s objectives developing policies and plans to achieve these objectives and allocating resources to implement the policies and plans to achieve the organization s objectives Strategic management therefore combines the activities of the various functional areas of a business to achieve organizational objectives This book is designed to support and enhance both learning and teaching An important aspect of the style adopted for this book is the use of exhibits presenting a vast gamut of information regarding special theoretical matter
