Strategic Arms Control After Salt:

Strategic Arms Control After Salt Stephen Cimbala, 1989-05 *The Strategic Defense Initiative* Ralph L. Dietl, 2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical catastrophe of the first order the downfall of the Soviet Union The Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system International Negotiations: A Bibliography Amos Lakos, 2019-02-22 The international system comprises a plurality of sovereign states often pursuing conflicting interests One means of resolving or managing conflicts between those states is diplomatic bargaining or negotiation In the last fifteen years the study of negotiation has attracted researchers from various disciplines in the social sciences and the vol **National Security, Military Power & the Role of Force in International Relations** United States. Department of the Army, 1976 *National Security, Military Power & the Role of Force in International Relations* Army Library (U.S.), 1976 Negotiating START Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to strategic stability and arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT

II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America s own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty s implications The Department of State Bulletin ,2010 **Bulletin of the Atomic Scientists** ,1986-08 **Monthly Catalog of United States Government Publications, Cumulative Index** United States.
