Strategic Change In Colleges And Universities Planning To Survive And Prosper:

Strategic Change in Colleges and Universities Daniel James Rowley, Herman D. Lujan, Michael G. Dolence, 1997-02-24 In *Strategic Change in Colleges and Universities* the Rowley Lujan and Dolence show how the strategic planning process can lead to more constructive and effective change within the college and university environment Solidly grounded in theory this practical book builds on the authors experience of successfully implementing an original strategic planning approach on a variety of campuses in the United States and Canada This powerful model works well in the wide range of higher educational settings provides a consistent framework that unifies all levels involved and is effective in keeping diverse groups of decision makers focused on the most important elements of the organization s success The authors outline step by step a strategic planning process that is uniquely tailored to the needs of academic settings where multiple constituencies require a more collaborative planning approach than is used in corporations *Strategic Change in Colleges and Universities* is filled with illustrative examples that clearly show how the authors strategic planning principles which they describe as a strategic planning engine work in practice The book also discloses practical and realistic methods of navigating the political land mines that often obstruct the development of a strategic plan and its implementation Offering clear directions on the many components of a successful implementation strategy the authors show how to encourage communication gain the backing of top leaders and develop campuswide support This collaborative model of strategic planning which unlike other approaches used in academe results in rather than starts from the institution s mission statement Each campus applies the same principles developing its own method of planning to match its institution s particular needs and characteristics *Strategic Change in Colleges and Universities* is written for those charged with strategic planning presidents chancellors vice presidents Details a strategic planning approach that has proved effective in institutions across the country The authors address the complex nature of stakeholders and conflicting purposes in an academic setting

Unrelenting Change, Innovation, and Risk Daniel J. Phelan, 2016-04-08 Arguably the nation s community colleges have experienced more change in the last several years than they have over the prior 115 years of their existence Rapid changes in technology external pressures for accountability and student completion aggressive competition from other higher education institutions i e public for profit and private changes in enrollment demographics as well as new

economic market and operational models stand to completely disrupt this relatively young enterprise Unrelenting Change provides useful practical examples for community college leaders as they seek to thoughtfully and strategically align their organization for the new dynamic in higher education Furthermore Unrelenting Change offers insights into the change process including institutional assessment and readiness consideration of cultural implications strategic intentions toward innovation as well as risk failure and success Rather than perceiving change and disruptive innovation as merely happenstance or luck the author provides discernment into the topic so as to give community college leaders solid guidance if not improved odds in undertaking this important competitive edge for the future of their intuitions and by extension their students

From Strategy to Change Daniel James Rowley, Herbert Sherman, 2004-03-29 In From Strategy to Change the last in a series Daniel James Rowley comes full circle in defining his unique vision of the strategic planning process Written with Herbert Sherman From Strategy to Change shows how to take the next step after a strategic plan has been formulated The authors clearly show how to implement a strategic plan that will meet the myriad challenges of today's complex higher education environment and spell success for the academy It is amazing that while sports teams of colleges and universities meticulously plan their contests against their opponents their institutions administrators don't spend nearly enough time or effort in creating and implementing a strategy Institutions of higher education seem to be missing the requisite tools to develop and activate their play book With this new age of globally available real time information it becomes increasingly more essential to have a map to help go over and around obstacles avoid the ever present pitfalls and effectively aid in selecting the best route Rowley and Sherman provide such tools in this exciting and comprehensive new book I wish that when I was a department chair president of a faculty senate and dean that this superb work was available My function in planning would have been so much easier and more rewarding Barry R Armandi Distinguished Teaching Professor SUNY Old Westbury
