Strategic Defenses and Arms Control Alvin Martin Weinberg, Jack N. Barkenbus, 1988 Strategy and Arms Control Thomas C. Schelling, Morton H. Halperin, 1985 This benchmark study in the field of national security and weapons control was first published in 1961 Republished with a new preface providing the perspectives of 1985 it focuses on the world's military environment and analyzes how that environment may or may not be improved through political arms control efforts The authors begin with a framework for understanding security defense and arms control relationships They also provide a framework for evaluating arms control proposals and for determining whether these proposals are in the security interests of the United States ISBN 0 08 032391 X 14 95 ISBN 0 08 032390 1 pbk 9 95 **Strategic Defenses** Office of the Technology Assessment, 2014-07-14 To contribute to the worldwide debate on President Reagan's Strategic Defense Initiative here are two important studies Ballistic Missile Defense Technologies and Anti Satellite Weapons Countermeasures and Arms Control Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Strategic Defences in the 1990's** Ivo H. Daalder, 1991-06-18 Examines the value of deploying strategic missile defences to counter the threat of nuclear accidents It concludes that the deployment of strategic defences in the 1990s will not be strategically desirable technically feasible or economically affordable *The Reagan Strategic Defense Initiative* Sidney David Drell, Philip J. Farley, David Holloway, 1985 The Strategic Defense Initiative Ralph L. Dietl, 2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US-SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co-creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical catastrophe of the first order the downfall of the Soviet Union The

Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system

Strategic Defense and Anti-satellite Weapons United States. Congress. Senate. Committee on Foreign Relations,1984 **The Strategic Defense Debate** Craig Snyder,2016-11-11 The goal of our strategic defense research program the vision and hope of the President is to stop Soviet missiles before they could destroy any targets be they in the United States or anywhere else The goal is noble and straightforward to destroy weapons that kill people Thus based on a realistic view of Soviet military planning the transition to strategic defense would not be destabilizing In fact any initial defensive capabilities would offer many benefits This objective is far more idealistic moral and practical than the position taken by those who still embrace the mutual assured destruction MAD theory that defenses must be totally abandoned Caspar Weinberger This is basically a research program and should remain so at least for the foreseeable future In a world that relies on an exquisite strategic balance to forestall the holocaust it would be the worst of blunders to jolt the tightrope when the safety net is tied at only one end James Schlesinger Neither Star Wars I or Star Wars II in whatever form one considers them is an effective response to the public s intuitive awareness of the unacceptable risk posed by our present nuclear strategy Robert McNamara The goal of our innovative science and technology program is to establish scientific feasibility and engineering validation of revolutionary concepts concepts with potential for full SDI technological development This forward looking office has a broad research charter which focuses on advanced directed energy concepts such as gamma ray lasers on novel sensing and data preprocessing techniques on advanced materials for space applications on innovations in spacepower and on emerging space science applications and ultra high speed supercomputing Interest in such exotic areas of science and technology clearly illustrates that SDI has greatly facilitated the mobilization of our nation s scientific community Lt Gen James Abrahamson Prominent world leaders and scientists came together in 1985 to discuss the technological feasibility and the political sensibility of Star Wars Their essays presented in The Strategic Defense Debate provide for the first time a comprehensive look at this timely and controversial subject Craig Snyder s introduction and headnotes to the collection highlight the critical points of each essay as well as their conceptual significance to the overall topic Contributors include Caspar Weinberger James Schlesinger Lieutenant General James A Abrahamson Robert S McNamara Andrew Cockburn Richard Pipes Stephen F Cohen Adam Garfinkle Leon Wieseltier Michael Vlahos Franklin Long Francis Pym Major Simon P Worden Richard Garwin Robert S Cooper Colin S Gray Robert Bowman Alex Glikson and Warren Zimmerman Excerpts from President Reagan s speech Peace and National Security and Ambassador Paul H Nitze s speech On the Road to a More Stable Peace are also included The essays were originally presented at a conference
