Steven Gray, Day trading as a lifestyle appeals to most people The fact that they can work from home put in only a few hours every day and take as many days off as they like makes it even more attractive You also do not need to ask your manager or employer for leave before you can spend time together with your family and friends You are in charge and you are responsible for all business decisions If you look at it critically such a way of living is alluring Of course if you also become an expert at day trading you have the potential to earn far more money each day than those in other professions you can make as much as thousands of dollars For example an individual or a company invests 15 000 in a mutual fund expecting a conservative annual return of 2% This would result in a total gain of 300 However if the same 15 000 is used by a skilled day trader to purchase stocks within a single day they could earn a remarkable profit of 8% by the end of the day amounting to 1 200 Consequently if the trader continues trading with the same level of proficiency it is possible to achieve profits significantly higher than 8% for a year This book has all the strategies you need to maximize your profit and avoid loss You will also learn how to trade in liquid markets These markets have sufficient trading volume to ensure ease of buying and selling positions without significant price fluctuations Slippage can be avoided while trading on liquid markets saving you hundreds or thousands of dollars
