Syst Dinfo Gestion Terri:

Creditor Reporting System ,1998 *Directory of Computer Software and Services* ,1995 Local Energy Communities Gilles Debizet,Marta Pappalardo,Frédéric Wurtz,2022-09-06 This book draws on social science analysis to understand the ongoing dynamics within and surrounding local energy communities in reliably electrified countries Belgium Canada Colombia France Germany India the Netherlands Spain Switzerland and the United Kingdom It offers a comprehensive overview of recent results and thus outlines a diversity of drivers and levers for scaling up energy communities or at least local energy sharing Analysing the main types of energy communities such as collective self consumption citizen cooperatives and peer to peer digital platforms the book does not only raise new questions for social scientists but also offers a comprehensive overview for all those contributing to the circular economy and the decentralization of energy production in inhabited areas where energy consumption is concentrated This book provides input for the ongoing debates in many European countries implementing the national law on the European directives for energy communities Furthermore without evading the antagonism between cooperative and market approaches or the contradictions between different issues the book outlines the innovative decision making tools that can facilitate the development of local energy production and sharing systems As well as being of interest to postgraduates and researchers in the field of energy studies this book will be vital to energy professionals looking to support local energy communities decision making and design who wish to consider sociological organizational and territorial dimensions *The Front-end of Large Public Projects* Terry M. Williams,Knut Samset,Gro Holst Volden,2022-06-07 Large public projects represent major complex investment and whilst there has been much written about how to develop manage and deliver such projects practice still does not match up with expectations In this book researchers from the Norwegian Concept Research Programme explore the paradoxes between theory and practice in collaboration with experts in the field of project governance This book delves into the reality of large public projects to show how they can be managed effectively and efficiently recognising the realities of their context It offers a range of practical conclusions as to the paradoxes of the governance and management of public projects The international spectrum of authors draw their examples from the UK Norway Canada France Australia and the Netherlands Bridging the gap between research theory and practice this book will benefit academics and researchers in the field of project management and corporate governance as well as those in the practice of public project governance civil servants and industry practitioners The Conflict in Syria and the Failure of International Law to Protect People Globally Jeremy Julian Sarkin,2021-11-28 This book explores through the lens of the conflict in Syria why international law and the United Nations have failed to halt conflict and massive human rights violations in many places around the world which has allowed tens of millions of people to be killed and hundreds of millions more to be harmed The work presents a critical socio legal analysis of the failures of international law and the United Nations UN to deal with mass atrocities and conflict It

argues that international law in the way it is set up and operates falls short in dealing with these issues in many respects The argument is that international law is state centred rather than victim friendly is to some extent outdated is vague and often difficult to understand and therefore at times hard to apply While various accountability processes have come to the fore recently processes do not exist to assist individual victims while the conflict occurs or the abuses are being perpetrated The book focuses on the problems of international law and the UN and in the context of the many enforced disappearances and arbitrary detentions in Syria why nothing has been done to deal with a rogue state that has regularly violated international law It examines why the responsibility to protect R2P has not been applied and why it ought to be used generally and in Syria It uses the Syrian context to evaluate the weaknesses of the system and why reform is needed It examines the UN institutional mechanisms the role they play and why a civilian protection system is needed It examines what mechanism ought to be set up to deal with the possible one million people who have been disappeared and detained in Syria The book will be a valuable resource for students academics and policy makers working in the areas of public international law international human rights law political science and peace and security studies *Knowledge Networks: The Social Software Perspective* Lytras, Miltiadis D.,Tennyson, Robert D.,Ordóñez de Pablos, Patricia,2008-11-30 This book concentrates on strategies that exploit emerging technologies for the knowledge effectiveness in social networks Provided by publisher Hydrogéologie ,1991 **Directory of Libraries in Canada** ,2007 **Bulletin Des Sociétés Canadiennes** ,1995 *Who Owns Whom* ,2008
