England and the Making of the Modern Political Imaginary Feisal G. Mohamed, 2020-02-06 This book argues that sovereignty is the first order question of political order and that seventeenth century England provides an important case study in the roots of its modern iterations It offers fresh readings of Thomas Hobbes John Milton and Andrew Marvell as well as lesser known figures and literary texts In addition to political philosophy and literary studies it also takes account of the period's legal history exploring the exercise of the crown's feudal rights in the Court of Wards and Liveries debates over habeas rights and contests of various courts over jurisdiction Theorizing sovereignty in a way that points forward to later modernity the book also offers a sustained critique of the writings of Carl Schmitt the twentieth century's most influential if also most controversial thinker on this topic

Storin, 2019-09-03 A seminal figure in late antique Christianity and Christian orthodoxy Saint Gregory of Nazianzus published a collection of more than 240 letters Whereas these letters have often been cast aside as readers turn to his theological orations or autobiographical poetry for insight into his life thought and times *Self-Portrait in Three Colors* focuses squarely on them building a provocative case that the finalized collection constitutes not an epistolary archive but an autobiography in epistolary form a single text composed to secure his status among provincial contemporaries and later generations Shedding light on late ancient letter writing

fourth century Christian intelligentsia Christianity and classical culture and the Christianization of Roman society these letters offer a fascinating and unique view of Gregory's life engagement with literary culture and leadership in the church As a single unit this autobiographical epistolary collection proved a powerful tool in Gregory's attempts to govern the contours of his authorial image as well as his provincial and ecclesiastical legacy
