Theorizing Self in Samoa Jeannette Marie Mageo, 2025-10-01 Theorizing Self in Samoa develops a new theory of the self in culture through a psychological and historical ethnography of Samoa As in many non Western cultures Samoan understandings of the self are more sociocentric accentuating the social roles that people play than egocentric emphasizing individual interior feelings and perceptions Yet in Samoa as in any culture aspects of the self that are not emphasized in cultural explanations of personhood continually

reappear and must somehow be accounted for Jeannette Marie Mageo argues that all cultures attempt to encompass these stray experiences of the self within a discursive system She introduces a way of charting human development through cultural discourses which helps reveal how emotion gender and sexuality are constructed in Samoan society and other cultures including our own The second half of the book explores the effects of cultural contact and colonialization on the innermost experience of cultural subjects With its long ethnographic record Samoa provides a unique opportunity to consider the dialectic between historical change and personal experience opening a perspective on the ways in which cultural history is forever leaving its fingerprints upon human lives Theorizing Self in Samoa marks out important territory for psychological anthropology and students of Oceania and will appeal also to students and scholars in cultural studies women s studies and history Jeannette Marie Mageo is Associate Professor of Anthropology Washington State University

[Handbook of Categorization in Cognitive Science](#) Henri Cohen, Claire Lefebvre, 2017-06-03 Handbook of Categorization in Cognitive Science Second Edition presents the study of categories and the process of categorization as viewed through the lens of the founding disciplines of the cognitive sciences and how the study of categorization has long been at the core of each of these disciplines The literature on categorization reveals there is a plethora of definitions theories models and methods to apprehend this central object of study The contributions in this handbook reflect this diversity For example the notion of category is not uniform across these contributions and there are multiple definitions of the notion of concept Furthermore the study of category and categorization is approached differently within each discipline For some authors the categories themselves constitute the object of study whereas for others it is the process of categorization and for others still it is the technical manipulation of large chunks of information Finally yet another contrast has to do with the biological versus artificial nature of agents or categorizers Defines notions of category and categorization Discusses the nature of categories discrete vague or other Explores the modality effects on categories Bridges the category divide calling attention to the bridges that have already been built and avenues for further cross fertilization between disciplines
