Take It And Leave It:

Take it or Leave it? Food and Agriculture Organization of the United Nations, 2018-06-13 In the last decade the increased interest in bioenergy production has led to the need for improved crop residue management Crop residues have historically been used for many other purposes to sustain healthy soils for food production as feed and bedding for livestock and as raw material for heating and cooking As the link between crop residue management and food security is evident one needs to decide whether or to which extent the removal of crop residues for bioenergy production is possible Building science based decision support tools can guide stakeholders in this decision process The study presents a first attempt in designing such a decision support tool for soil residue management The study seeks to explore the effect of crop residue management on soil quality and yield two crucial aspects for food security More than 1 000 peer reviewed journal papers of the past ten years were studied in order to assess i whether crop residue application is associated with higher soil organic carbon SOC ii whether it ameliorates soil structure and iii if the change in SOC related to residue application has a positive impact on yields The findings of this report demonstrate that crop residue management has to be contextualized suggesting the need for site specific residue management schemes in coarse soils located in tropical climates and in SOC depleted soils located in temperate climates crop residue removal is not advisable

Congress. Senate. Committee on Military Affairs,1946 Equal Parenthood and Social Policy Linda Haas,1992-07-01 Sweden is the only society in the world that has as an official goal the equal participation of fathers and mothers in childcare Equal Parenthood and Social Policy analyzes the government program which best symbolizes this commitment to equal parenthood parental leave With return to one s original job being assured a Swedish couple has twelve months to divide between them so that one parent can stay home to care for their new offspring While a few other countries mostly in Scandinavia have paid parental leave available to fathers Sweden s program is the oldest and most generous as well as the one most closely committed to realizing complete equality between men and women in every sphere of social life

In analyzing this unique social program Haas describes the social political and economic circumstances which led Sweden to take such a revolutionary stance on the issue of shared parenthood Haas also discusses the extent to which Swedish fathers take advantage of their right to parental leave barriers to fathers participation and fathers experiences while on leave along with the effects that leavetaking has on mothers and fathers later labor market involvement and participation in childcare This study of the Swedish program raises important questions about future prospects for equal parenthood in Sweden and other industrial societies and more significantly about the potential effectiveness of social policy for bringing about the end of such a cultural universal as women s responsibility for infants *Code of Federal Regulations* ,1997
