Taxing Automobile Emissions For Pollution Control:

Taxing Automobile Emissions for Pollution Control Maureen Sevigny, 1998 This innovative book examines the role an automobile emissions tax could play in reducing emissions in the United States The author concludes that an emissions tax has the potential to reduce emissions from household vehicles significantly even when travel demand is relatively price inelastic Beginning with a theoretical discussion of a first best tax a second best tax on passenger vehicles is developed This study contains detailed analyses of the design of the tax behavioural responses that lead to emissions reductions including reductions in the household's vehicle miles of travel and the scrapping of low value high emitting vehicles the effect of the tax on the reduction of emissions the effect of the tax on households in different income quintiles the emissions reducing potential of a gasoline tax compared to an emissions tax This study uses a simulation model to analyse the sensitivity of travel demand and the resulting emissions to different tax rates and demand elasticities The author concludes that an emissions tax has the potential to reduce emissions from household vehicles significantly even when travel demand is relatively price inelastic **Taxing Automobile Emissions for Pollution Control** will prove invaluable to policymakers and academics in the field of environmental management and environmental economics and policy

Environmental Taxation in Practice Thomas Sterner, 2017-05-15 Since the 1980s market based instruments for environmental policy have become increasingly important Focusing on environmental taxation in practice this volume collects key contributions on a wide range of topics including comparisons of environmental taxation schemes in different countries political economy issues and key aspects of concrete implementation It presents a wealth of ex ante and ex post analyses intended as a source of guidance for policy implementation and research The volume features a full length introduction locating the literature on environmental taxation in practice in a wider context of theoretical and applied issues

Distributional Effects of Environmental and Energy Policy Don Fullerton, 2017-05-15 Many effects of environmental and energy policy are likely to disproportionately burden those with low income First it raises the price of fossil fuel intensive products that constitute a high fraction of low income budgets like gasoline heating fuel and electricity Second the handout of pollution permits to firms provides value to those who own them Third low income individuals may place more value on food and shelter than on improvements in environmental quality so high income individuals may get the most benefit of pollution abatement Fourth air quality improvements may raise the value of houses owned by landlords rather than helping renters These effects might all hurt the poor more than the rich This book brings together the seminal economics literature that studies whether these fears are valid and whether anything can be done about them

Critical Issues in Environmental Taxation

Lin Heng Lye, 2009 *Critical Issues in Environmental Taxation* is an internationally refereed publication devoted to environmental taxation issues on a worldwide basis. It seeks to provide insights and analysis for achieving environmental goals through tax policy. By sharing the perspectives of the authors in response to the diverse challenges posed by environmental taxation issues, effective approaches used in one country may be considered and possibly implemented by governmental authorities in other countries. Each volume contains pioneering and thought provoking articles contributed by the world's leading environmental tax scholars. This seventh volume focuses on the special problems of the urban environment and the challenges which confront cities and mega cities. It examines tax issues relating to congestion and pollution control, road pricing and other forms of transportation management, housing and the construction industry, energy generation and consumption, trade, carbon taxes and new eco service markets, research and development taxes. It contains case studies from developed as well as developing countries. Contributors come from various disciplines, particularly law, accounting and economics. The countries examined include Australia, Brazil, Canada, China, Hong Kong, Japan, Kenya, Pakistan, Singapore, Spain, Uganda and the United States.

Environmental Taxation in China and Asia-Pacific Hope Ashiabor, Larry Kreiser, Julsuchada Sirisom, J E Milne, 2011 *Environmental Taxation in China and Asia Pacific* contains a rich collection of papers addressing issues of vital importance to policy formulation in a spectrum of environmental areas. While not everyone would agree to all that is said in each of the papers, the book will certainly trigger fruitful debates. It is also a great source of information on environmental policy developments in major economies that will need to play an increasing role in addressing major issues such as climate change mitigation.

Nils Axel Braathen, Principal Administrator, OECD Environment Directorate. Another outstanding volume on environmental taxation, this time with focus on China and the Asia Pacific. Legal, economic and policy contributions offer great insight in the present situation and future developments in this fascinating part of the world.

Kurt Deketelaere, KU Leuven, Belgium; University of Dundee, UK and University of Qatar. *Environmental Taxation in China and Asia Pacific* contains an integrated set of detailed chapters providing insights and analysis on how fiscal policy can be used to achieve environmental sustainability. Highly topical chapters include energy tax policy in China, environmental fiscal reform, carbon tax policy in northeast Asia and environmental taxation strategies in China, Asia and Australia, as well as many other relevant topics. Written by distinguished environmental taxation scholars from around the world, the emphasis of this book is on finding solutions to environmental problems which merit serious consideration by policy makers as well as academics in environmental law and other academic disciplines.
