Teacher Education: Curriculum and change David Hartley, Maurice Whitehead, 2006 Trivializing Teacher Education

Dale D. Johnson, 2005-07-21 *Trivializing Teacher Education* The Accreditation Squeeze presents a critical analysis of the National Council for Accreditation of Teacher Education NCATE This accreditation organization has been in existence for 50 years and claims to accredit approximately 700 teacher education programs that prepare two thirds of the nation s teachers There is no convincing research however that NCATE s stamp of approval makes a difference in teacher preparation programs or in beginning teachers competencies There is evidence that NCATE is masterful at self promotion marketing and aligning itself with policy makers and politicians This book illustrates the questionable NCATE processes and requirements and exposes the exorbitant costs accrued by universities seeking NCATE accreditation It points out that the NCATE standards do not address the major issues that impact teaching and learning The book highlights NCATE s support of teacher testing in the face of evidence that such tests lack predictive validity It shows how NCATE is reaching out to accredit for profit organizations and how it sends its evaluators to review international programs in the Middle East The book calls on NCATE to make the professional backgrounds of its examiners reviewers board members and staff transparent It addresses the attention teacher educators must devote to mindless trivial NCATE demands that usurp time that should be spent on their students and their research This book urges teacher educators college faculties and administrators state education officials and legislators parents of school age children and concerned citizens to open their eyes to this powerful organization NCATE and to examine what it has done to teacher education in the last half century *Transforming Teacher Education* Valerie Hill-Jackson, Chance W. Lewis, 2023-07-03 Extracts from the text Why are fifteen million children and youth in poverty not achieving when we know that low income students excel in the classrooms of star teachers who comprise approximately 8 percent of the teaching force Whose needs or interests are being met in education reform today In my own institution there has not been a systematic assessment of the effectiveness of the basic teacher education program since the institution was founded over a century ago as a teachers college Imagine not one ever Teachers who empathize with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet the needs of their students Half of the starry eyed beginners are gone in five years or less Why does teacher education focus on the managerial instrumental or delivery system aspects of the profession The expert advice dispensed by schools of education regarding what future teachers should do is not connected to any theory of learning or to any reality of life in school classrooms Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their students Does a qualified teacher equate to a quality teacher The best hope of getting more effective teachers from university teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children and youth At the district level the salaries of hiring officials should be based on how well these officials identify and retain quality teachers In this book 12 distinguished scholars provide a hard hitting thoroughly researched historical and

theoretical critique of our schools of education and offer clear recommendations on what must be done to ensure all children can achieve their potential and contribute to a vibrant democratic society

Reforming Teacher Education Sheila Nataraj Kirby, 2006 Teacher education has been subject to both scathing criticism and innumerable efforts designed to reform it or to save it from being dismantled One of the latest and most well funded efforts aimed at teacher education reform is boldly titled Teachers for a New Era TNE Eleven colleges and universities of various types nationwide were selected to participate in TNE The TNE initiative emphasizes evidence based decisionmaking close collaboration between education and arts and sciences faculty and teaching as an academically taught clinical practice profession The RAND Corporation and the M Excellence for All Jack Schneider, 2010 Excellence For All American Education Reform 1983 2008 examines the history of school reform in the United States over the past quarter century Specifically the work examines an approach to educational change best characterized by the phrase excellence for all an equity focused policy phenomenon uniquely situated for the policymaking context of the late twentieth and early twenty first centuries The idea of promoting excellence for all students united a broad enough coalition to pursue a truly national reform effort and captured the imaginations of leaders in state and local government at philanthropic foundations in colleges and universities and in school districts across the country Led by a corps of self styled educational entrepreneurs aggressively pursuing reforms that they could take to scale the movement sought to remake the American high school piece by piece The dissertation examines this reform movement through the nation s three largest districts New York Chicago and Los Angeles and through three particular change efforts a physical plant reform the small schools movement a personnel reform Teach For America and a curricular reform the Advanced Placement Program The work aims to establish the ways in which this most recent era of school reform represented a departure from previous reform eras strives to explain the movement s broad appeal and ultimately aims to understand its shortcomings by exploring the assumptions underlying the excellence for all approach and the tradeoffs required by it
