Improving Teacher Morale and Motivation Ronald Williamson, Barbara R. Shelley, Larry D. Yore, Brian B. Hand, 2008-12-30 Statistical models attempt to describe and quantify relationships between variables In the models presented in this chapter there is a response variable sometimes called dependent variable and at least one predictor variable sometimes called independent or explanatory variable When investigating a possible cause and effect type of relationship the response variable is the putative effect and the predictors are the hypothesized causes Typically there is a

main predictor variable of interest other predictors in the model are called covariates Unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry Bock Velleman given the model p is the probability that a relationship is seen by mere chance The smaller the p value the more confident we can be that the pattern seen in the data is not random In the type of models examined here the R measures the proportion of the variation in the response variable that is explained by the predictors specified in the model if R is close to 1 then almost all the variation in the response variable has been explained This measure is also known as the multiple correlation coefficient Statistical studies can be grouped into two types experimental and observational

Uncivil Rights Jonna Perrillo, 2024-05-31 Almost fifty years after Brown v Board of Education a wealth of research shows that minority students continue to receive an unequal education At the heart of this inequality is a complex and often conflicted relationship between teachers and civil rights activists examined fully for the first time in Jonna Perrillo's *Uncivil Rights* which traces the tensions between the two groups in New York City from the

Great Depression to the present While movements for teachers rights and civil rights were not always in conflict Perrillo uncovers the ways they have become so brought about both by teachers who have come to see civil rights efforts as detracting from or competing with their own goals and by civil rights activists whose aims have de professionalized the role of the educator Focusing in particular on unionized teachers Perrillo finds a new vantage point from which to examine the relationship between school and community showing how in this struggle educators activists and especially our students have lost out **Striving for Excellence** ,2000
