Teacher Research And Educational Reform:

Teacher Research and Educational Reform Sandra Hollingsworth, Hugh Sockett, 1994 Changing Patterns of Power Thomas S. Popkewitz, 1993-01-01 The reform of teacher education has been a focal point of state action in industrial countries since the early 1980s Given this convergence of educational and governmental activity the studies presented here are a significant departure from conventional discourse on reform because they explore the ways that social regulation and political power operate through the processes of educational reform This book considers the reform of teacher education to be an integral part of the larger system of social regulation that takes place in the arena of schooling Reforms in teacher education involve complex sets of interactions among and within social institutions These interactions help shape power relations and patterns of social regulation that operate through state university and school interactions Nevertheless the patterns that give direction and value to teacher education are not easily discerned in public discussions of educational change Instead many of the most important regulatory aspects of teacher education reform are partly obscured by a public discourse that focuses attention on formal responses to socioeconomic events and that tends to divert critical attention away from the power that is exercised and the interests that are served during reform This volume presents studies of reform in Australia Finland Iceland Portugal Spain Sweden the United Kingdom and the United States Although these countries differ in their political and social histories rates and levels of industrialization and patterns of educational practice there is a striking commonality in both the strategies that are employed to reform teacher education and in the nature of social regulation that is a concomitant of reform School Reform Proposals Alex Molnar, 2002-04-01 Twelve American academics and researchers contribute 13 chapters to this text reviewing current research on the conditions policies and practices in the reform of the American public school system Coverage includes an examination of schools as institutions and their structures the teachers who deliver public education and various proposals to replace all or part of the traditional public education system with institutions from outside that system The reforms examined include examples of those which have clearly demonstrated their effectiveness and others of questionable value For scholars policymakers and citizens interested in education reform No subject index Annotation copyrighted by Book News Inc Portland OR *Encyclopedia of Educational Reform and Dissent* Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American

schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily

Inside/Outside Marilyn Cochran-Smith, Susan L. Lytle, 1993 The central concern of Inside Outside is the assumption that pedagogical knowledge is generated outside in that is from the university to be applied at schools The first half provides a thoughtful conceptual framework for reading and understanding teacher research exploring its history potential and relationship to university based research In the second half the voices of teacher researchers contrast engage and combine as contributors explore the meaning and significance of their approaches and findings These authors enter into the national conversation about school reform teacher professionalism multicultural curriculum and pedagogy and language and literacy education

Teacher Educational Reform Ivan Reid, Hilary Constable, Roy Griffiths, 1994-09-28 This is a much needed book Assessment and Evaluation in Higher Education This book is essential reading for all those working together to improve teacher education Curriculum This book brings together current research on teacher education reform in the United Kingdom Beginning with an outline of the principles and directives involved in the reform and a review of their implementation to date the book considers the lack of a research base to the reforms their ideologically driven base and the need for evaluative and informative research

The Politics of Teacher Education Reform National Commission on Teaching & America's Future (U.S.), 2000-04-18 Yearbook of the Politics of Education Association A competent caring and

qualified teacher for every student in the United States This audacious goal is taken right from the opening pages of the report of the National Commission on Teaching and America's Future NCTAF What Matters Most Teaching for America's Future The NCTAF findings are so powerful and unique that The Politics of Teacher Association PTA uses them as the basis for this 2000 Yearbook Editors Gallagher and Bailey along with leading educators explore the controversies and ramifications of the Commission's major recommendations Get serious about standards for both students and teachers Reinvent teacher preparation and professional development Overhaul teacher recruitment and put qualified teachers in every classroom Encourage and reward teaching knowledge and skill Create schools that are organized for student and teacher success The contributors to this book speak to the underlying assumptions research bases and values found in the recommendations Long time and persistent issues about teaching teacher education programs and public policy making are examined under the new light of the latest research Real life successes of the recommendations in action are shown in two state level stories and an urban school partnership This PEA 2000 yearbook will prove a valuable resource for students researchers and all educators interested in teacher education reform in the 21st century Teacher Quality 2.0 Frederick M. Hess, Michael Q. McShane, 2014 Argues that much cutting edge work in teacher quality is happening in non traditional environments such as online or hybrid learning where teacher roles can be very specialized or in charter schools that are experimenting with new approaches to staffing The editors examine fruitful innovations taking place on the margins of the traditional education sector that promise to improve teacher quality in a more strategic way Change Forces Michael Fullan, 1993-01 Knowledge in the process of educational change is said to be a missing ingredient in attempts to bring about educational innovation This volume analyzes what is known about productive change processes and identifies corresponding action strategies at the individual school local and state levels
