Teachers And Football:

Teachers and Football Colm Kerrigan, 2004-12-10 The 1870 Education Act that opened up elementary education for all children contained no provision for outdoor games This book explains how teachers through the elementary school football association introduced boys to organized football as an out of school activity The influence and significance of this work insofar as it relates to the elementary school curriculum and the growth of professional and amateur football are explored in detail including How ideological commitments and contemporary concerns for the physical welfare of children in cities may have led teachers to promote schoolboy football when it was not permitted during school hours The extent to which out of school organised football may have led to outdoor games being accepted as part of the school curriculum How elementary school football in London in the late nineteenth century influenced the development of the amateur game This is a fascinating account of the origins of schoolboy football and the factors that have influenced its development and the consequences and benefits that have followed not only for school football but for sport in schools and communities as a whole The Global Spread of Football from the 1860s to the 1880s Thomas Adam, 2025-08-05 This book offers a study of how football became in the 1870s a global sport that was played by high school students on several continents It provides a horizontal perspective that focusses on the spread of football in the 1870s from its English cradle to Germany the United States and Argentina It will be the very first account of football that does not treat this sport in isolation but brings together the phenomenon of football with the conditions in nineteenth century high schools and the crisis of urban living and thereby explains why this sport was so willingly and quickly accepted into various societies and cultures around the globe Football was part of the social reform movement that emerged in the second half of the nineteenth century in response to the social ills of urban life Adults and children spent more and more time inside badly ventilated buildings Beginning in the 1870s social reformers and teachers called for the introduction into school curricula of physical exercises that could be conducted on the meadows and sport fields outside cities **I Hate School** John Baxter, 2013-08-22 Why Do So Many Kids HATE School A Paradigm Shift Is Necessary In Education And Now A Colledge Football Coach Offers Such Reform As coaches we have opportunities that teachers do not Coaching is a performance based working relationship that relies on the mastery of fundamentals and technique to create a competitive advantage Coaches are held accountable for an athlete s performance on and off the field This leads us very quickly to a fork in the road We can bend the rules academically and manipulate the system so that they can get through and stay eligible or we can invest deeply in them and help them technically and fundamentally so that they can become legitimate independent performers in all areas of life I see myself at the center of the paradigm shift which is based on skills and ideas not subjects and orders Study hall medication tutoring and other conventional forms of intervention aren t what we need They aren t the long term solution We need sustained performance based change that is built on fundamentals and technique If we are going to effect permanent long lasting fundamental change the paradigm shift has to

begin somewhere other than in the schools Therefore parents and educators must pursue such change individually through a program like Academic Gameplan Academic Gameplan is a coaching based program that teaches the rules fundamentals and techniques to the game of school The life skills we teach are SOLID SIMPLE and REPEATABLE AGP is the ROCK upon which students are building lifelong success **What Teachers Can Learn From Sports Coaches** Nathan Barber,2014-08-20
