the emerging and evolving conditions that shape the work lives and identities of teachers It offers geographically diverse
accounts of the teacher and teaching demonstrating what it means to do critical research well Teachers and their practice
have been and continue to be important sites of critical research This book offers varied perspectives from diverse
geographies to examine how teacher subjectivities are shaped by conditions of possibility Collectively they show how
critiquing conditions rather than the teachers themselves provide a means for problematising the teacher while also
advocating the well being of teachers as humans Contributions offer compelling examples of how critical scholars can
emphasise teaching as a political and value laden exercise and therefore treat the teacher subject as also being constituted
through political and value laden discourses Critical Perspectives on Teachers and Teaching offers a provocation to inspire
new questions moving forward That is critical researchers have an obligation to challenge taken for granted assumptions not
only by looking outwards at the policymakers edu businesses and intergovernmental agencies e g OECD but also by looking
inwards and challenging their assumptions about power discourse and subjectivity This book was originally published as a
