**The Civil War And the American System** W. Allen Salisbury, 2015-09-03 When historian W Allen Salisbury first wrote this book in 1978 he was seeking to teach Americans that the battle between the American System of economics and the British System of free trade which resulted in the Civil War was at the center of the political battles of the 20th century Today this is even more true The heirs of Adam Smith and the British Empire are pressing for worldwide adoption of free trade a system which led to slavery in the 19th century and would do so again today And certain U S political circles are even openly demanding a return to the principles and Constitution of the Confederacy Utilizing a rich selection of primary source documents Salisbury reintroduces the forgotten men of the Civil War era battle for the American System Mathew Carey his son and successor Henry Carey William Kelley William Elder and Stephen Colwell Together with Abraham Lincoln they demanded industrial technological progress against the ideological subversion of British free trade economists and the British dominated Confederacy Salisbury highlights the career of Henry C Carey who as Lincoln s leading economic adviser acted to prevent a complete City of London banker s takeover of the United States political economic system *How To Defeat Liberalism And William F. Buckley* Lyndon H. LaRouche, Jr., 2019-09-11 The modern British liberals have thus deployed a pincers movement against the political institutions of the United States The overt liberals attack from the left while the fifth column of liberals in conservative disguises infiltrates from the right and shatters the resistance against liberalism from within To the extent that the national party machines are under the total or significant control of the New York crowd around CFR the party leaderships and their candidates are unable to reach agreement on any policies but those which run deliberately against the most vital interests of the United States and its people If the nonliberals plus a majority of trade unionists and minority strata were to assemble themselves as a unified political force nationally the effect of this would be to establish the New York Times Washington Post Newsweek and so forth as despised dirty words in a majority of the neighborhoods factories and so forth of the nation This has not occurred thus far because the national profile of the two principal parties prevents the nonliberal majority of the citizenry from agreeing upon policy outlooks which efficiently correspond to the combined effect of their underlying interests and organically nonliberal impulses Lyndon LaRouche in this book This 1979 book by Lyndon LaRouche outlines the strategy for unifying the American citizenry around the real long term interest of each citizen regardless of personal circumstances endless progress Forty years later his insights are key to the process which is now pulling America out of the Dark Age which had been fostered by the British cultural warfare he identified Yes the continuous string of hoaxes from London are wearing very thin with Americans Lone Assassin Energy Crisis New Hitler with Weapons of Mass Destruction Recreational Drug Use Global Warming Crisis Russia did it regardless of what it is etc have destroyed the credibility of the various imperial tentacles More and more Americans along with most of the nations of the world are coalescing behind the ideas of Mr LaRouche for universal progress *Treason In America*

Anton Chaitkin, *The Oligarchy that usurped power in the USA against America's revolutionary heritage that has now destroyed the economy* What is it Anton Chaitkin's *Treason in America* is the original authoritative inquiry into this criminal apparatus the British Empire and its arms in Wall Street Boston and the South *Empire, Technology and Seapower* Howard J. Fuller, 2014-01-03 This book examines British naval diplomacy from the end of the Crimean War to the American Civil War showing how the mid Victorian Royal Navy suffered serious challenges during the period Many recent works have attempted to depict the mid Victorian Royal Navy as all powerful innovative and even self assured In contrast this work argues that it suffered serious challenges in the form of expanding imperial commitments national security concerns precarious diplomatic relations with European Powers and the United States and technological advancements associated with the armoured warship at the height of the so called Pax Britannica Utilising a wealth of international archival sources this volume explores the introduction of the monitor form of ironclad during the American Civil War which deliberately forfeited long range power projection for local coastal command of the sea It looks at the ways in which the Royal Navy responded to this new technology and uses a wealth of international primary and secondary sources to ascertain how decision making at Whitehall affected that at Westminster The result is a better balanced understanding of Palmerstonian diplomacy from the end of the Crimean War to the American Civil War the early evolution of the modern capital ship including the catastrophic loss of the experimental sail and turret ironclad H M S Captain naval power projection and the nature of empire technology and seapower This book will be of great interest to all students of the Royal Navy and of maritime and strategic studies in general [The Other Canon of Economics, Volume 1](#) Erik Reinert, 2024-02-13 *Other Canon Economics Essays in the Theory and History of Uneven Economic Development* brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies **Basic Economics for Conservative Democrats** Lyndon LaRouche, As I spell the point out in the main text of this book a sound national economic policy in the tradition of Alexander Hamilton enables us to simultaneously increase profits and wages This can be accomplished in only one way It is accomplished by transforming scientific and technological advances into what Hamilton termed artificial labor machines which use sources of energy above and beyond the energy of the human musculature In the overall life of our nation or any nation for that matter neither

business nor labor can prosper without a policy of promoting technological progress through the means of improved investment in productive capital Once business and labor recognize that they both have the same overall fundamental national economic policy interest in common that understanding establishes a mass electoral basis of support for the kinds of policies which business farmers and labor as a whole rightly demand      **Library of Congress Catalogs** Library of Congress,1980      Clad in Iron Howard J. Fuller,2007-12-30 This work addresses many persistent misconceptions of what the monitors were for and why they failed in other roles associated with naval operations of the Civil War such as the repulse at Charleston April 7 1863 Monitors were ironclads not fort killers Their ultimate success is to be measured not in terms of spearheading attacks on fortified Southern ports but in the quieter much more profound strategic deterrence of Lord Palmerston's ministry in London and the British Royal Navy's potential intervention The relatively unknown Cold War of the American Civil War was a nevertheless crucial aspect of the survival or not of the United States in the mid 19th century Foreign intervention explicitly in the form of British naval power represented a far more serious threat to the success of the Union blockade the safety of Yankee merchant shipping worldwide and Union combined operations against the South than the Confederate States Navy Whether or not the North or South would be clad in iron thus depended on the ability of superior Union ironclads to deter the majority of mid Victorian British leaders otherwise tempted by their desire to see the American experiment in democratic class structures and popular government finally fail Discussions of open European involvement in the Civil War were pointless as long as the coastline of the United States was virtually impregnable Combining extensive archival research on both sides of the Atlantic this work offers an in depth look at how the Union Navy achieved its greatest grand strategic victory in the American Civil War Through a combination of high tech machines armed with monster guns intensive coastal fortifications and a new fleet of high speed Union commerce raiders the North was able to turn the humiliation of the Trent Affair of late 1861 into a sobering challenge to British naval power and imperial defense worldwide      *The Civil War Round Table* Civil War Round Table (Chicago, Ill.),1976      Subject Catalog Library of Congress,1979
