Ron Baxley, Jr.

The Cockatoos Lie:

The Cockatoo's Lie Marion Bloem,1996 At the core of Marion Bloem s work are the difficulties facing second generation Dutch Indonesians children who were born in The Netherlands but who are sufficiently Indonesian to be barred from belonging to either country They feel most drawn to Indonesia but the realities of that country conflict with the nostalgic tales their older relatives tell about the East Indies The Cockatoos Edward John Mulawka,2016-04-28 This reference book on the cockatoo family provides a comprehensive physical description of the various species of this exotic parrot the habitat they favor and their distribution and behaviors both in the wild and in captivity Their reproductive history is examined as is the possibility of breeding sufficient numbers in captivity to develop sustainable populations for re introduction to their original habitat should they become extinct in the wild The book explores the historical encounters of the various species with Europeans two centuries ago That early history provides considerable insight to the cockatoo s popularity and to efforts to breed them in captivity Many cockatoo species face a perilous future As their native forests are logged the cockatoos lose not only suitable nesting and roosting sites but native foods Additionally despite conservation laws governing the capture of wild cockatoos their desirability as an avian pet has spawned a worldwide illicit trade critically endangering some species to the point that they face extinction in the wild *Stray Feathers* Penny Olsen,Leo Joseph,2011-06-21 Logos of CSIRO and Australian Biological Resources Study ABRS at foot of title page Cockatoos Matt Cameron,2007 Cockatoos are large intelligent and attractive birds Of the twenty one recognized species fourteen occur in Australia with three of these also found in New Guinea Seven species are distributed across the islands of south east Asia While many species are common or abundant an increasing number face extinction due to habitat loss the illegal bird trade and global warming **Everybody's Magazine** ,1921 **Naamah** Sarah Blake,2020-04-07 A dreamy and transgressive feminist retelling of the Great Flood from the perspective of Noah s wife as she wrestles with the mysterious metaphysics of womanhood at the end of the world O The Oprah Magazine With the coming of the Great Flood the mother of all disasters only one family was spared drifting on an endless sea waiting for the waters to subside We know the story of Noah moved by divine vision to launch their escape Now in a work of astounding invention acclaimed writer Sarah Blake reclaims the story of his wife Naamah the matriarch who kept them alive Here is the woman torn between faith and fury lending her strength to her sons and their wives caring for an unruly menagerie of restless creatures silently mourning the lover she left behind Here is the woman escaping into the unreceded waters where a seductive angel tempts her to join a strange and haunted world Here is the woman tormented by dreams and questions of her own questions of service and self determination of history and memory of the kindness or cruelty of fate In fresh and modern language Blake revisits the story of the Ark that rescued life on earth and rediscovers the agonizing burdens endured by the woman at the heart of the story Naamah is a parable for our time a provocative fable of body spirit and resilience **The Talking City of Oz** Ron Baxley, Jr.,2011-11-01 Dorothy Gale wishes that the Emerald City

could talk the Wizard of Oz O Z Diggs gains a love interest through magic means Ozma gets kidnapped by some villains Wogglebug the highly magnified professor insect and some flies protest against Dorothy and a jewel encrusted rocky creature created by Ruggedo the former Nome King unfortunately makes Dorothy's wish come true in an unexpected way in this modern Oz novel about the regret of wishes and adventuring This book reunites Ozian favorites and brings many new characters and lands into L Frank Baum's universe

The Action Plan for Australian Birds 2010 Stephen Garnett, Judit Szabó, Guy Dutson, Guy C. L. Dutson, 2011 The Action Plan for Australian Birds 2010 is the third in a series of action plans that have been produced at the start of each decade The book analyzes the International Union for Conservation of Nature IUCN status of all the species and subspecies of Australia's birds including those of the offshore territories For each bird the size and trend in their population and distribution has been analyzed using the latest iteration of IUCN Red List Criteria to determine their risk of extinction The book also provides an account of all those species and subspecies that are or are likely to be extinct Each categorization is justified on the basis of the latest research including much unpublished material that has been made available during workshops conducted with leading ornithologists and conservation biologists around the country as well as phone interviews and correspondence The result is the most authoritative account yet of the status of Australia's birds In this completely revised edition each account covers not only the 2010 status but provides a retrospective assessment of the status in 1990 and 2000 based on current knowledge taxonomic revisions and changes to the IUCN criteria and then reasons why the status of some taxa has changed over the last two decades Maps have been created specifically for the Action Plan based on vetted data drawn from the records of Birds Australia its members and its partners in many government departments The book contains some surprises some alarming some encouraging The status of some birds has improved over the last two decades as a result of dedicated conservation management Some may not have changed status but at least they are holding their own Many however are continuing to decline and a distressing number are new to the list There is also an increasing number of birds for which captive insurance populations need not only to be considered as a future option but actively pursued before it is too late But this is not a book of lost causes It is a call for action to keep the extraordinary biodiversity we have inherited and pass the legacy to our children Every one of Australia's threatened taxa can be saved This book describes the populations of species at greatest risk and outlines ways we can turn them around

[The Linguistics of Sitting, Standing and Lying](#) John Newman, 2002-09-24 This volume explores properties of sit stand and lie verbs reflecting three of the most salient postures associated with humans An introductory chapter by the Editor provides an overview of directions for research into posture verbs These directions are then explored in detail in a number of languages Dutch Korean Japanese Lao Chantyal Magar Tibeto Burman Chipewyan Athapaskan Trumai spoken in Brazil Kxoe Khoisan Mbay Nilo Saharan

Oceanic Enga Ku Waru Papuan Arrernte Pitjantjatjara Ngan gityemerri Australian The contributors discuss data relevant to many fields of linguistic inquiry including patterns of lexicalization e g simplex or complex verb forms morphology e g state vs action formations grammaticalization e g extension to locational predicates aspect markers auxiliaries copulas classifiers and figurative extension A final chapter reports on an experimental methodology designed to establish the relevant cognitive parameters underlying speakers judgements on the polysemy of English stand Taken together the chapters provide a wealth of cross linguistic data on posture verbs

The Action Plan for Australian Birds 2020 Stephen T. Garnett, G Barry Baker, 2021-12-01 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia s avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated
