Miller, 2014-03-18 Thomas P Miller defines college English studies as literacy studies and examines how it has evolved in tandem with broader developments in literacy and the literate. He maps out four corners of English departments: literature, language studies, teacher education, and writing studies. Miller identifies their development with broader changes in the technologies and economies of literacy that have redefined what students write and read, which careers they enter, and how literature represents their experiences and aspirations. Miller locates the origins of college English studies in the colonial transition from a religious to an oratorical conception of literature. A belletristic model of literature emerged in the nineteenth century in response to the spread of the penny press and state mandated schooling. Since literary studies became a common school subject, professors of literature have distanced themselves from teachers of literacy. In the Progressive era, that distinction came to structure scholarly organizations such as the MLA, while NCTE was established to develop more broadly based teacher coalitions. In the twentieth century, New Criticism came to provide the operating assumptions for the rise of English departments until those assumptions became critically overloaded with the crash of majors and jobs that began in the 1970s and continues today. For models that will help the discipline respond to such challenges, Miller looks to comprehensive departments of English that value studies of teaching, writing, and language as well as literature. According to Miller, departments in more broadly based institutions have the potential to redress the historical alienation of English departments from their institutional base in work with literacy. Such departments have a potentially quite expansive articulation apparatus. Many are engaged with writing at work, in public life, with schools, and public agencies, with access issues, and with media, ethnic, and cultural studies. With the privatization of higher education, such pragmatic engagements become vital to sustaining a civic vision of English studies and the humanities generally.

A Reference Guide for English Studies Michael J. Marcuse, 1990-01-01 This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature. Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's *Literary Research Guide* (Modern Language Assn of America, 1989), larger academic libraries will want Marcuse's volume.
