Rich Apparel Maria Hayward, 2017-03-02 English dress in the second half of the sixteenth century has been studied in depth yet remarkably little has been written on the earlier years or indeed on male clothing for the whole century The few studies that do cover these neglected areas have tended to be quite general focusing upon garments rather than the wearers As such this present volume fills an important gap by providing a detailed analysis of not only what people wore in Henry s reign but why The book describes and analyses dress in England through a variety of documents including warrants and accounts from Henry s Great Wardrobe and the royal household contemporary narrative sources legislation enacted by Parliament guild regulations inventories and wills supported with evidence and observations derived from visual sources and surviving garments Whilst all these sources are utilised the main focus of the study is built around the sumptuary legislation or the four Acts of Apparel passed by Henry between 1509 and 1547 English sumptuary legislation was concerned primarily with male dress and starting at the top of society with the king and his immediate family it worked its way down through the social hierarchy but stopped short of the poor who did not have sufficient disposable income to afford the items under consideration Certain groups such as women and the clergy who were specifically excluded from the legislation are examined in the second half of the book Combining the consideration of such primary sources with modern scholarly analysis this book is invaluable for anyone with an interest in the history of fashion clothing and consumption in Tudor society **Colour Chemistry** Robert M Christie, 2015-11-09 This revised and up dated second edition provides a current insight into how the fundamental principles of the chemistry of colour are applied in dyes and pigments The text has been expanded and re written throughout while largely maintaining the structure of the first edition In particular the chapter on functional dyes has been substantially re written to embrace the significant developments in chemistry and technology that this area has experienced in the last decade As industry and society have become increasingly sensitive towards environmental issues the chapter describing how the colour industry has been responding is expanded to reflect this growing importance A new chapter is introduced on colour in cosmetics with particular emphasis on hair dyes reflecting the growing international industrial significance of this topic This chapter is co written with Dr Olivier Morel Colour Chemistry will be of interest to academics and industrialists who are specialists in colour science or who have involvement with the diverse range of coloured materials for example traditional application in textiles paints printing inks plastics and cosmetics and functional applications in electronics and biology Broad and balanced in its coverage this book provides an introduction to the chemistry of colour that is ideal for students graduates and those in industry and academia seeking an introduction to the

topic Robert Christie is a Professor in Colour Chemistry and Technology at Heriot Watt University Scotland and a Distinguished Adjunct Professor at the King Abdulaziz University Saudi Arabia He also acts as a consultant to the colour manufacturing and application industry worldwide **Perishable Material Culture in Prehistory** Linda M.

Hurcombe,2014-04-24 Perishable Material Culture in Prehistory provides new approaches and integrates a broad range of data to address a neglected topic organic material in the prehistoric record Providing news ideas and connections and suggesting revisionist ways of thinking about broad themes in the past this book demonstrates the efficacy of an holistic approach by using examples and cases studies No other book covers such a broad range of organic materials from a social and object biography perspective or concentrates so fully on approaches to the missing components of prehistoric material culture This book will be an essential addition for those people wishing to understand better the nature and importance of organic materials as the missing majority of prehistoric material culture Asia in Amsterdam Rijksmuseum

(Netherlands),2015-01-01 Discusses the Asian luxury goods that were imported into the Netherlands during the 17th century and demonstrates the overwhelming impact these works of art had on Dutch life and art during the Golden Age **Greek**

and Roman Textiles and Dress Mary Harlow,Marie-Louise Nosch,2014-09-30 Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity stressing the need for cross and inter disciplinary study in order to gain the fullest picture of surviving material Issues addressed include the importance of studying textiles to understand economy and landscape in the past different types of embellishments of dress from weaving techniques to the late introduction of embroidery the close links between the language of ancient mathematics and weaving the relationships of iconography to the realities of clothed bodies including a paper on the ground breaking research on the polychromy of ancient statuary dye recipes and methods of analysis case studies of garments in Spanish Viennese and Greek collections which discuss methods of analysis and conservation analyses of textile tools from across the Mediterranean discussions of trade and ethnicity to the workshop relations in Roman fulleries Multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up to date account of the state of current research The volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media The volume is part of a pair together with Prehistoric Ancient Near Eastern and Aegean Textiles and Dress an interdisciplinary anthology edited by Mary Harlow C ile Michel and Marie Louise Nosch **Bright Colours from the Past** Maarten R. van Bommel,Matthijs de Keijzer,2025-07-07 The invention of

Mauveine by Perkin in 1856 led to a revolution in the world of textile dyeing In the second half of the 19th century natural dyes were quickly replaced by newly developed synthetic dyes which resulted in a bright palette of colours The synthetic dyes were not only cheaper to produce but also easier to apply on textiles due to new dyeing mechanisms As a result production costs decreased tremendously and brilliantly dyed textiles became available to the larger public The introduction

of synthetic dyes had a strong impact in fashion in addition these colourants were also used as stains on furniture as inks and in paints In this publication the development of these vivid colourants is presented It brings together information about the history of synthetic dyes including the first attempts the so called semi synthetic dyes and presenting the most relevant dyes and dye classes such as nitro dyes tri arylmethanes azo dyes xanthenes sulfur dyes synthetic alizarin and synthetic indigo It contains a wealth of information regarding the numerous synonyms trade names manufacturers and patents International trade and competition which was fierce are discussed The chemistry behind the synthetic dyeing is explained including new dyeing technologies developed The application of dyes and their fastness properties are also presented An overview of analytical techniques used for characterisation is given Many case studies are included expressing the importance of the dyes and the creativity of mankind when applying these colourants As such this publication can be seen as a colourful journey through history relevant for conservators curators historians chemists and all who are interested in the history and development of synthetic dyes

Shakespeare and Costume Patricia Lennox, Bella Mirabella, 2015-02-26 Inspired by new approaches in performance studies theatre history research in material culture and dress history a rich discussion of the many aspects of costume in Shakespearean performance has begun Shakespeare and Costume furthers this research bringing together varied and stimulating essays by leading scholars that consider costume from literary dramatic design performative and theatrical perspectives as well as interviews with renowned theatre practitioners Jane Greenwood and Robert Morgan The volume amply demonstrates how an analysis of the meaning of costume enriches our understanding of Shakespeare's plays Beginning with an overview of the stage history of Shakespeare and costume the volume looks at the historical context of clothing in the plays considering topics such as royal self fashioning festive livery practices and conceptions of race and gender exhibited in clothing choice as well as costume in performance Drawing on documentary evidence in designers renderings illustrations in periodicals paintings photographs newspaper reviews and actors memoirs the volume also explores costume designs in specific Shakespeare productions from the re opening of the London theatres in 1660 to the present day

A Revolution in Colour Giorgio Riello, Maria Hayward, Ulinka Rublack, 2024-09-19 This major volume aims to re colour the European world of dress c 1300 1800 New dyes created one of the most important visual experiences of the period yet their story has been side lined by a focus on visual experiences shaped by the high arts Meanwhile theatrical productions and period films still abound with broad assumptions about the growing dominance of black clothing for elites during the period while ordinary people are imagined having worn coarse greys and bleached garments This volume presents clear evidence that even the clothing of the middle classes could be much more expensive than paintings and that coloured clothing and accessories were ubiquitous across society Contributors shed new light on the economic environmental and cultural dimensions of colour in dress The range of dyes expanded considerably in the sixteenth and seventeenth centuries drawing on Asian and Mediterranean knowledge new collections of recipes and the greater

diversity of plants available through New World trade Working creatively with organic plant animal and mineral materials to make colours involved considerable knowledge pleasure and skill The creation of colour through dyes thus reveals a whole range of global agricultural and craft technologies that can inspire future material worlds and transforms our understanding of Europe s cultural heritage
