Broadway Rhythm Dominic Symonds,2017-11-16 Broadway Rhythm is a guide to Manhattan like nothing you ve ever read Author Dominic Symonds calls it a performance cartography and argues that the city of New York maps its iconicity in the music of the Broadway songbook A series of walking tours takes the reader through the landscape of Manhattan clambering over rooftops riding the subway and flying over skyscrapers Symonds argues that Broadway s songs can themselves be used as maps to better understand the city though identifiable patterns in the visual graphics of the score the auditory experience of the music and the embodied articulation of performance recognizing in all of these patterns corollaries inscribed in the terrain geography and architecture of the city Through musicological analyses of works by Gershwin Bernstein Copland Sondheim and others the author proposes that performance cartography is a versatile methodology for urban theory and establishes a methodological approach that uses the idea of the map in three ways as an impetus a metaphor and a tool for exploring the city

Built to Last Stanley Turkel,Stanley Turkel Cmhs Ishc,2011 Built to Last 100 Year Old Hotels East of the Mississippi is a sequel to my 2011 book Built To Last 100 Year Old Hotels in New York It has 86 chapters one for each century old hotel of 50 rooms or more east of the Mississippi River and each is illustrated by an antique postcard The Foreword was written by Joseph McInerney CHA President of the American Hotel Lodging Association The book has been accepted for promotion distribution and sale by the American Hotel Lodging Educational Institute My research into the histories of these hotels turned up fascinating stories about single minded developers brilliant and accidental architects dedicated owners famous and infamous guests and even the story of an underground bunker shelter the size of two football fields built under a hotel to house the U S Government in the event of a nuclear war

Religion, Space, and the Atlantic World John Corrigan,2017-11-30 An interdisciplinary exploration of the influence of physical space in the study of religion While the concept of an Atlantic world has been central to the work of historians for decades the full implications of that spatial setting for the lives of religious

people have received far less attention In *Religion Space and the Atlantic World* John Corrigan brings together research from geographers anthropologists literature scholars historians and religious studies specialists to explore some of the possibilities for and benefits of taking physical space more seriously in the study of religion Focusing on four domains that most readily reflect the importance of Atlantic world spaces for the shape and practice of religion texts design distance and civics these essays explore subjects as varied as the siting of churches on the Peruvian Camino Real the evolution of Hispanic cathedrals Methodist identity in nineteenth century Canada and Lutherans in early eighteenth century America Such essays illustrate both how the organization of space was driven by religious interests and how religion adapted to spatial ordering and reordering initiated by other cultural authorities The case studies include the erasure of Native American sacred spaces by missionaries serving as cartographers which contributed to a view of North America as a vast expanse of unmarked territory ripe for settlement Spanish explorers and missionaries reorganized indigenous built space to impress materially on people the surveillance power of Crown and Church The new environment and culture often transformed old institutions as in the reconception of the European cloister into a distinctly American space that offered autonomy and solidarity for religious women and served as a point of reference for social stability as convents assumed larger public roles in the outside community Ultimately even the ocean was reconceptualized as space itself rather than as a connector defined by the land masses that it touched requiring certain kinds of religious orientations to both space and time that differed markedly from those on land Collectively the contributors examine the locations and movement of people ideas texts institutions rituals power and status in and through space They argue that just as the mental organization of our activity in the world and our recall of events have much to do with our experience of space we should take seriously the degree to which that experience more broadly influences how we make sense of our lives

A History of New York François Weil, 2004 In telling the story of how New York has grown from Dutch colonial outpost to the global city the capital of the 21st century François Weil also examines the social tensions that have arisen from this evolving role and how the New York experience has affected American notions of urban space

Melville's City Wyn Kelley, 1996-07-26 She shows that images both from Melville and from popular sources of the time represented New York variously as Capital Labyrinth City of Man and City of God and she goes on to demonstrate that he resisted a generalizing or totalizing representation of the city by revealing its hybrid identity and giving voice to the poor the displaced and the racially excluded
