The Common Bond The University Of Texas System Cancer Center Code Of Ethics:

The Common Bond Jan Van Eys, James M. Bowen, 1986 **Ethical Challenges in Oncology** Colleen Gallagher, Michael Ewer, 2017-06-23 *Ethical Challenges in Oncology* Patient Care Research Education and Economics covers a wide variety of topics and viewpoints about ethical issues that arise in oncology throughout the full cancer care continuum. This book provides a holistic view on oncology ethics incorporating the knowledge and expertise of authors from various departments and oncology specialties within the University of Texas MD Anderson Cancer Center. The first section focuses on the ethical issues associated with treating cancer patients. Next the ethical challenges associated with oncology research including funding regulation subject selection and the big picture are explored. The third section covers ethical issues associated with education in oncology as it reflects both past and future trends in developing proficient health care providers patients and even executives. Final sections concentrate on the ethical dilemmas associated with the economic repercussions of oncology offering thoughts on how to alleviate the ethical consequences that can arise from the global effects of cancer and cancer treatment. Each chapter includes discussion topics answers pertinent questions and provides an ethical framework for problem solving in each scenario. The topics uncover the ethical apprehensions and problems associated with oncology research and practice in order to determine best practices as well as provide guidance for all parties involved. Offers a diverse range of topics and viewpoints about ethical issues that arise in oncology. Provides direction by bringing real issues to the forefront. Contains a truly ethical approach on problems as broad as research finance appropriateness of care and professional education. *Medicine and the Ethics of Care* Diana Fritz Cates, Paul Lauritzen, 2002-03-01 In these essays a diverse group of ethicists draw insights from both religious and feminist scholarship in order to propose creative new approaches to the ethics of medical care. While traditional ethics emphasizes rules justice and fairness the contributors to this volume embrace an ethics of care which regards emotional engagement in the lives of others as basic to discerning what we ought to do on their behalf. The essays reflect on the three related themes community narrative and emotion. They argue for the need to understand patients and caregivers alike as moral agents who are embedded in multiple communities who seek to attain or promote healing partly through the medium of storytelling and who do so by cultivating good emotional habits. A thought provoking contribution to a field that has long been dominated by an ethics of principle. *Medicine and the Ethics of Care* will appeal to scholars and students who want to move beyond the constraints of that traditional approach.
