The Common Place The Ordinary Experience Of Housing Design And The Built Environment:

The Common Place Peter King, 2018-01-18 Much of what constitutes our experience of our immediate environment is quite ordinary and familiar in particular where we live While policymakers and academics are constantly seeking transformations in housing what we seek from our own housing is stability and lack of change We seek secure roots to our lives rather than step changes and radical reform This book considers this ordinary experience of housing and how we come to depend upon it The notion of the ordinary is used to argue against the conceits of policymaking and the fetish for domestic design Using a variety of methods such as critical analysis and film criticism looking at the work of film makers as diverse as Bergman Dreyer Shyamalan Tarkovsky Tati and the Wachowski Brothers it provides an original impressionistic view of the role housing plays in our lives

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

Making Progress in Housing Sean McNelis, 2014-01-21 This book presents a new approach to housing research one that is relevant to all the social sciences Housing research is diverse and operates across many disciplines approaches and methods making collaboration difficult This book outlines a methodological framework that enables researchers from many different fields to collaborate in solving complex and seemingly intractable housing problems It shows how we can make progress in housing research and deliver better housing outcomes through an integrated approach Drawing on the work of renowned Canadian methodologist philosopher theologian and economist Bernard Lonergan 1904 1984 McNelis outlines a framework for collaborative research Functional Collaboration This new form of collaboration divides up the work of housing research into functional specialties These distinguish eight inter related questions that arise in the process of moving from the current housing situation through to providing practical advice to decision makers To answer each question a different method is required Making progress in housing is the result of finding new answers to this complete set of eight inter related questions This approach to collaboration opens up a new discourse on method in housing and social research as well as new debates on progress and the

nature of science **The British National Bibliography** Arthur James Wells, 2006 **Common Places** Dell Upton, John Michael Vlach, 1986 Exploring America's material culture Common Places reveals the history culture and social and class relationships that are the backdrop of the everyday structures and environments of ordinary people Examining America's houses and cityscapes its rural outbuildings and landscapes from perspectives including cultural geography decorative arts architectural history and folklore these articles reflect the variety and vibrancy of the growing field of vernacular architecture In essays that focus on buildings and spaces unique to the U S landscape Clay Lancaster Edward T Price John Michael Vlach and Warren E Roberts reconstruct the social and cultural contexts of the modern bungalow the small town courthouse square the shotgun house of the South and the log buildings of the Midwest Surveying the buildings of America's settlement scholars including Henry Glassie Norman Morrison Isham Edward A Chappell and Theodore H M Prudon trace European ethnic influences in the folk structures of Delaware and the houses of Rhode Island in Virginia's Renish homes and in the Dutch barn widely repeated in rural America Ethnic regional and class differences have flavored the nation's vernacular architecture Fraser D Neiman reveals overt changes in houses and outbuildings indicative of the growing social separation and increasingly rigid relations between seventeenth century Virginia planters and their servants Fred B Kniffen and Fred W Peterson show how following the westward expansion of the nineteenth century the structures of the eastern elite were repeated and often rejected by frontier builders Moving into the twentieth century James Borchert tracks the transformation of the alley from an urban home for Washington's blacks in the first half of the century to its new status in the gentrified neighborhoods of the last decade while Barbara Rubin's discussion of the evolution of the commercial strip counterpoints the goals of city planners and more spontaneous forms of urban expression The illustrations that accompany each article present the artifacts of America's material past Photographs of individual buildings historic maps of the nation's agricultural expanse and descriptions of the household furnishings of the Victorian middle class the urban immigrant population and the rural farmer's homestead complete the volume rooting vernacular architecture to the American people their lives and their everyday creations **American Book Publishing Record**, 2006 **All-Inclusive Engagement in Architecture** Farhana Ferdous, Bryan Bell, 2020-12-22 Should all inclusive engagement be the major task of architecture All Inclusive Engagement in Architecture Towards the Future of Social Change presents the case that the answer is yes Through original contributions and case studies this volume shows that socially engaged architecture is both a theoretical construct and a professional practice navigating the global politics of poverty charity health technology neoliberal urbanism and the discipline's exclusionary basis The scholarly ideas and design projects of 58 thought leaders demonstrate the architect's role as a revolutionary social agent Exemplary works are included from the United States Mexico Canada Africa Asia and Europe This book offers a comprehensive overview and in depth analysis of all inclusive engagement in public interest design for instructors students and professionals alike showing how this approach to architecture can bring forth a radical reformation

of the profession and its relationship to society *The Systemic Turn in Human and Natural Sciences* Lucia Urbani Ulivi, 2018-12-14 This book is dedicated to the consolidation and to the expansion of theoretic systems thinking as a necessary integration of the general reductionist and analytical attitude dominant in our culture Reductionism and analytical approaches have produced significant results in many fields of contemporary knowledge giving a great contribution to relevant scientific discoveries and to their technological application but their validity has been improperly universalized as the only and best methods of knowledge in every domain It is nowadays clear that analytical or mereological approaches are inadequate to solve many problems and that we should introduce or support the diffusion of new concepts and different research attitudes A good candidate to support such a shift is the well known theoretical approach based on the concept of system that no more considers the elementary constituents of an object but the entity emerging from the relations and interactions among its elementary parts It becomes possible to reconstruct several domains both philosophical and scientific from the systemic point of view introducing fresh ideas in the research in view of a general rational vision of the world on more comprehensive basis This book contributes to the diffusion and evolution of systemic thinking by focusing on two main objectives developing and updating the systemic approach in disciplines currently using it and introducing the systemic perspective in humanistic disciplines where the approach is not widely used *The Systemic Turn in Human and Natural Sciences* A Rock in the Pond is comprised of ten chapters The chapter authors adopt a trans disciplinary perspective consisting in the recognition and harmonization of the special outlooks that together within the general systemic paradigm gives an ideal unity to the book **Affordable Housing in New York** Nicholas Dagen Bloom, Matthew Gordon

Lasner, 2019-12-31 A richly illustrated history of below market housing in New York from the 1920s to today A colorful portrait of the people places and policies that have helped make New York City livable *Affordable Housing in New York* is a comprehensive authoritative and richly illustrated history of the city's public and middle income housing from the 1920s to today Plans models archival photos and newly commissioned portraits of buildings and tenants by sociologist and photographer David Schalliol put the efforts of the past century into context and the book also looks ahead to future prospects for below market subsidized housing A dynamic account of an evolving city *Affordable Housing in New York* is essential reading for understanding and advancing debates about how to enable future generations to call New York home

Irish Housing Design 1950 - 1980 Brian Ward, Michael Pike, Gary Boyd, 2019-12-11 This book examines the architectural design of housing projects in Ireland from the mid twentieth century This period represented a high point in the construction of the Welfare State project where the idea that architecture could and should shape and define community and social life was not yet considered problematic Exploring a period when Ireland embraced the free market and the end of economic protectionism the book is a series of case studies supported by critical narratives Little known but of high quality the schemes presented in this volume are by architects whose designs helped determine future architectural thinking in Ireland

and elsewhere Aimed at academics students and researchers the book is accompanied by new drawings and over 100 full colour images with the example studies demonstrating rich architectural responses to a shifting landscape
