provides the answers to life's hardest questions **The Oxford Handbook of Banking and Financial History** Youssef Cassis, Richard S. Grossman, Catherine R. Schenk, 2016-07-21 The financial crisis of 2008 aroused widespread interest in banking and financial history among policy makers, academics, journalists and even bankers in addition to the wider public. References in the press to the term Great Depression spiked after the failure of Lehman Brothers in November 2008 with similar surges in references to economic history at various times during the financial turbulence. In an attempt to better understand the magnitude of the shock there was a demand for historical parallels. How severe was the financial crash? Was it in fact the most severe financial crisis since the Great Depression? Were its causes unique or part of a well-known historical pattern? And have financial crises always led to severe depressions? Historical reflection on the recent financial crises and the long-term development of the financial system go hand in hand. This volume provides the material for such a reflection by presenting the state of the art in banking and financial history. Nineteen highly regarded experts present chapters on the economic and financial side of banking and financial activities, primarily though not solely in advanced economies, in a long-term comparative perspective. In addition to paying attention to general issues, not least those related to theoretical and methodological aspects of the discipline, the volume approaches the banking and financial world from four distinct but interrelated angles: financial institutions, financial markets, financial regulation and financial crises. *The Great Paper Bubble; Or, the Coming Financial Explosion ... A Campaign Document for 1864* Alexander DEL MAR, 1864 Digital Currencies and Public Law Andrew Dahdal, 2024-09-30 This book supports the deeper engagement of public lawyers in digital currency developments which threaten dramatic changes in the relationship between individuals and government authorities. No contemporary issue is more widely acknowledged and less understood than that of digital currencies. The voice of constitutional scholars, however, is crucially missing from prevailing digital money discourses. Private law scholars are grappling with the legal questions raised by digital currency models in property and contract. Public law scholars, by contrast, have yet to appreciate the significance of the moment. The challenge of understanding the technical dimensions of digital money innovations has obscured the potential constitutional revolution digital currencies represent. This book proceeds from the proposition that money is best conceived as a constitutional phenomenon. When seen as such, it becomes clear that changes in the nature of money represent changes in political and constitutional arrangements. Explaining how and in what ways those changes will take place is the primary focus of this book. Through an examination of historical episodes where the nature of money has been linked to renewed constitutional settlements, this book distils a core set of principles linking aspects of monetary innovation, such as technical control of the money supply, to constitutional positions such as executive fiscal accountability. From these principles, a conceptual framework is proposed that translates the specific attributes of digital currency proposals into the language of constitutional dynamics. The book will be of interest to students, academics and practitioners with an interest in the law of digital currencies, constitutional law and politics. *The Coming African Hour*

Luc Sindjoun, 2010 The Coming African hour is not a slogan nor wishful thinking It is a conclusion that derives from an insightful analysis of the current situation pertaining on the continent Several African scholars coming from different regions and academic backgrounds are elaborating ideas and arguments in order to explain the constraints and to illustrate the opportunities The result of that scientific gathering is a book that synthesizes and renews the reflections on development What is at stake is not to be pessimistic or optimistic about Africa The epistemological challenge is to understand what is going on By focusing on converging and diverging African realities on the issues of state civil society gender and development strategies the authors of the book show under which conditions the African hour is coming At that level the commitment for political science meets the commitment for Africa The main success of this book is to overcome the preconceived ideas and self fulfilling prophecies about Africa Here the analysis avoids the trap of indulgence then hope is based on truth Consequently the coming African hour is not inescapable it is as analyzed a possibility that its achievement depends on institutional human political social and economic factors **Hidden Fortunes** Barrett

implosion of 2008 And for many of us the details of what led to the recession and why it has continued remain murky Economic historian Larry Allen clears up the subject in *The Global Economic Crisis* offering an insightful and nonpartisan chronology of events and their consequences Illuminating the interlocked economic processes that lay beneath the crisis he analyzes the changing nature of the global financial system central bank policies housing bubbles deregulation sovereign debt crises and more Allen begins the timeline with the economic crisis in Japan in the late 1990s asking whether Japan's experience could be an indicator of the outcome of the recession and what it can teach us about managing a sluggish economy He then takes a comparative look at the economies of Brazil China and India Throughout he argues that many elements have contributed to the ongoing crisis including the introduction of the euro the growth of new financial instruments such as securitization collateralized debt obligations and credit default swaps interest rate policies and the housing boom and subprime mortgage fiasco Lucid and informative *The Global Economic Crisis* provides an impartial explanation to anyone seeking to understand the current state and future of the world's economy *The Father's Heartbeat* Ella Jane Coley, 2009-11
