Social-philosophical Foundations of Education Frederick Marshall Schultz, 1974 Social-philosophical Foundations of Education Frederick Marshall Schultz, 1977 **Philosophical Foundations of Education** Siddheshwar Rameshwar Bhatt, 2018-07-16 This book provides a philosophical foundation to the theory and practice of education from the Indian perspective. It is guided by an axionoeitic approach to education and therefore it deals with the epistemological foundation and value orientation of education. The author discusses the ontological, epistemological, logical, ethical, and axiological bases of education in a holistic and integrated manner. The author maintains that education is a planned, methodical, and purposive enhancement of human potentialities as a natural development. This presupposes correct and adequate formulation of the objectives and goals of education as per the needs and aspirations of pupils. Education also equips individuals for a good quality of life. Keeping in view the applied dimension of philosophy, this book analyses practical issues of moral education like character building, value negativism in the context of education. It also deals with issues concerning peace, sustainable development, sustainable, judicious consumption, etc., which should have a bearing on educational policies and programmes.

The Moral Foundations Of Educational Research Sikes, Pat, Nixon, John, Carr, William, 2003-04-01 This book considers what is distinctive about educational research in comparison with other research in the social sciences. As the contributors all agree that education is always an essentially moral enterprise, discussion about methodology starts not with the widely endorsed claim that educational research should be useful and relevant but with the attempt to justify and elaborate that claim with reference to its moral foundations.

Philosophical Foundations for Moral Education and Character Development George F. McLean, Frederick Edward Ellrod, 1992

Philosophical Foundations of Quality of Life Alex C. Michalos, 2017-06-14 This first volume has as its main focus the philosophical foundations of Michalos' work and describes it in the broad context of the study of logic, the philosophy of social sciences, and a general theory of value. After distinguishing things that have value from the value that things might have, it describes the foundations of a pragmatic theory of value. This theory plays a key role in the author's research on the quality of life and connects his empirical research to the philosophical tradition of the American pragmatists: William James, Ralph Barton Perry, John Dewey, and Clarence Irving Lewis. The volume addresses various aspects and issues concerning decision making, including decision procedures used in committees, used for assessing the acceptability of scientific theories, and new technologies, procedures for a science court, ethical issues involved in the formation of beliefs, some limitations of classical economists' alleged postulates of rational preference, and the importance of analytic guides to decision making. Finally, it describes the organization of the Social Sciences Federation of Canada and a formal accounting system for scientific research.
