Social Role Of Art 34 Essays:

Left Shift John A. Walker, 2001-12-21 John Walker brings to vivid life a neglected period in twentieth century art history. He re-creates a time when visual fine artists under the impact of left wing politics, women's liberation and the gay movement were seeking to re-establish a social purpose. His story is one of a struggle for art by contending factions in the art world in which artists, curators, critics and organisations both establishment and alternative, key exhibitions, galleries and magazines all play a part. He offers welcome insight into the work of the key players and the many forms they used to express radical engagement in the events of the decade.

The Proletarian Wave Sunyoung Park, 2020-05-11 Socialist doctrines had an important influence on Korean writers and intellectuals of the early twentieth century. From the 1910s through the 1940s a veritable wave of anarchist, Marxist, nationalist and feminist leftist groups swept the cultural scene with differing agendas as well as shared demands for equality and social justice. In *The Proletarian Wave* Sunyoung Park reconstructs the complex mosaic of colonial leftist culture by focusing on literature as its most fertile and enduring expression. The book combines a general overview of the literary left with the intellectual portraits of four writers whose works exemplify the stylistic range and colonial inflection of socialist culture in a rapidly modernizing Korea. Bridging Marxist theory and postcolonial studies, Park confronts Western preconceptions about third world socialist cultures while interrogating modern cultural history from a post Cold War global perspective. *The Proletarian Wave* provides the first historical account in English of the complex interrelations of literature and socialist ideology in colonial Korea. It details the origins, development and influence of a movement that has shaped twentieth century Korean politics and aesthetics alike through an analysis that simultaneously engages some of the most debated and pressing issues of literary historiography: Marxist criticism and postcolonial cultural studies.

Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics, experimental art and urban design. For Willats a cluster of concepts about control and feedback within living and machine systems, cybernetics offered a new means to make art relevant. For decades Willats has built relationships through art with people in tower blocks, underground clubs, middle class enclaves and warehouses on the Isle of Dogs to investigate their current conditions and future possibilities. Sharon Irish's study demonstrates the power of Willats's multi-media art to catalyze communication among participants and to upend ideas about audience and art. Here Irish argues that it is artists like Willats who are now the instigators of social transformation.

Studies on the Abuse & Decline of Reason F.A. Hayek, 2024-05-31 Studies on the Abuse and Decline of Reason is a series of fascinating essays on the study of social phenomena How to best and most accurately study social interactions has long been debated intensely and there are two main approaches the positivists who ignore intent and belief and draw on methods based in the sciences and the nonpositivists who argue that opinions and ideas drive action and are central to understanding social behavior F A Hayek's opposition to the positivists and their claims to scientific rigor and certainty in the study of human behavior is a running theme of this important book Hayek argues that the vast number of elements whose interactions create social structures and institutions make it unlikely that social science can predict precise outcomes Instead he contends we should strive to simply understand the principles by which phenomena are produced For Hayek this modesty of aspirations went hand in hand with his concern over widespread enthusiasm for economic planning As a result these essays are relevant to ongoing debates within the social sciences and to discussion about the role government can and should play in the economy

The Critical Twilight (Routledge Revivals) John Fekete, 2014-08-07 First published in 1977 this book was the first to map extensively the ideological typography of the Anglo American tradition of literary theory It interrogates comprehensively and in detail the assumptions and categorical development within critical ideas from I A Richards and T S Eliot through John Crowe Ransom and the New Criticism to Northrop Frye and Marshall McLuhan This analysis reveals the Anglo American tradition of literary cultural theory is most

Women Artists in Interwar France Paula J. Birnbaum, 2017-07-05 Women Artists in Interwar France Framing Femininities illuminates the importance of the Soci des Femmes Artists Modernes more commonly known as FAM and returns this group to its proper place in the history of modern art In particular this volume explores how FAM and its most famous members Suzanne Valadon Marie Laurencin and Tamara de Lempicka brought a new approach to the most prominent themes of female embodiment the self portrait motherhood and the female nude These women reimagined art s conventions and changed the direction of both art history and the politics of their contemporary art world FAM has been excluded from histories of modern art despite its prominence during the interwar years Paula Birnbaum s study redresses this omission contextualizing the group s legacy in light of the conservative politics of 1930s France The group s artistic response to the reactionary views and images of women at the time is shown to be a key element in the narrative of modernist formalism Although many FAM works are missing one reason for the lack of attention paid to their efforts Birnbaum s extensive research through archives press clippings and first hand interviews with artists families reclaims FAM as an important chapter in the history of art from the interwar years

Epic Negation Charles Daniel Blanton, 2015 Epic Negation examines the dialectical turn of modernist poetry over the interwar period arguing that late modernism inverts the method of Ezra Pound s poem including history to conceive a negated mode of epic predicated on the encryption of disarticulated historical content

Complicity and Responsibility in Contemporary African Writing Minna Johanna Niemi,2021-05-03 This book investigates the many ways in which contemporary African fiction has reflected on themes of responsibility and complicity during the postcolonial period Covering the authors Ayi Kwei Armah Tsitsi Dangarembga Nuruddin Farah Michiel Heyns and J M Coetzee the book places each writer s novels in their cultural and literary context in order to investigate similarities and differences between fictional approaches to individual complicity in politically unstable situations In doing so the study focuses on these texts representations of discomfiting experiences of being implicated in harm done to others in order to show that it is precisely during times of political crisis that questions of moral responsibility and implicatedness in
