

SOCIAL ACTION THEORY

Social Action Theory is a theory that attempts to examine people's actions and the underlying reasons for those actions. Below are four types of social actions proposed by sociologist Max Weber.

VALUE-RATIONAL ACTION

Action based on a commitment to a set of personal values or beliefs, e.g. the pursuit of social justice.

RATIONALLY PURPOSEFUL ACTION

Goal-oriented action that occurs as a result of rational decision-making, e.g. firing lazy employees to save money.

AFFECTIVE ACTION

Action based on emotions rather than rationality, e.g. crying at the death of an entirely fictional movie character.

TRADITIONAL ACTION

Action based on ritual, tradition, and cultural norms. e.g. putting up a Christmas tree on December 1st.

Social Action And Human Nature:

Social Action and Human Nature Axel Honneth, Hans Joas, 1988 The Critical Theory of Axel Honneth Danielle Petherbridge, 2013-09-05 The Critical Theory of Axel Honneth provides a comprehensive study of the work of Axel Honneth tracing the theoretical trajectory from his earliest writings on philosophical anthropology to the development of a theory of recognition The book argues that Honneth's early work provides important insights for the reconstruction of the normative project of critical theory and the articulation of a conceptual framework for analyzing social relations of power and domination Danielle Petherbridge contends however that these aims are not fully realized in Honneth's more mature project and that central insights recede as his project develops Petherbridge seeks to demonstrate that the basis for an alternative theory of intersubjectivity that can account for both an adequate theory of power and normative forms of subject formation can be immanently reconstructed from within Honneth's own work By contextualizing Honneth's project in relation to its theoretical influences The Critical Theory of Axel Honneth provides a critical study and excellent entry point that will be essential reading for both students and scholars who work in the areas of European philosophy critical theory social and political philosophy or social and political theory **Axel Honneth: Critical Essays** Danielle Petherbridge, 2011-08-11 Axel Honneth Critical Essays brings together critical interpretations of the work of Axel Honneth from his earliest to his most recent writings together with a comprehensive reply by Honneth that provides significant insights and clarifications into his project overall Existentialism and Social Work Neil Thompson, 2017-09-29 Existentialism and Social Work provides a clearly expressed and well argued exposition of Sartrean existentialism as a theory base for social work practice It introduces the key concepts and themes of the philosophy and relates them to social welfare theory and practice Existentialism is a valuable means of making sense of many of the complexities contradictions and dilemmas which social work staff encounter The book explores the relationship between theory and practice and examines how existentialism can help to bridge the gap A number of theoretical perspectives are evaluated from an existentialist perspective and links are drawn between Sartre's philosophy and aspects of commonly used theories and methods But this is not simply a theoretical analysis Neil Thompson also explores the use of existentialism as a guide to day to day practice and draws up a set of Principles for Practice The ultimate aim is to present existentialism as a concrete philosophy of praxis Social Work and Disasters Margaret Alston, Tricia Hazeleger, Desley Hargreaves, 2019-01-11 Disasters are increasing in frequency and intensity across the world causing significant destruction to individuals and communities Yet many social workers are ill prepared for the demands of this field of practice This book discusses the role of social workers in disaster work including in disaster preparedness during the disaster and in post disaster practice It addresses the complexities of social work disaster practice noting the need for social workers to understand the language of trauma and to respond effectively The authors discuss disaster theory and practice drawing out elements of practice at macro meso and micro levels and at various stages of the disaster They examine

the factors that shape vulnerability in disasters and draw out the possibility of post traumatic growth The final section discusses strategies for self care in disaster practice noting the organisational and personal strategies that can be adopted to facilitate the wellbeing of workers in the field With real life case studies from top scholars in the field this book is essential reading for social work practitioners working in the field of disaster practice as well as social work students and academics It will also be useful to other health professionals who wish to understand this field of practice *Environment, Climate, and Social Justice* Devendraraj Madhanagopal, Christopher Todd Beer, Bala Raju Nikku, André J. Pelser, 2022-07-09 This book approaches environmental climate and social justice comprehensively and interlinked The contributors predominantly from the Global South and have lived experiences challenge the eurocentrism that dominates knowledge production and discourses on environmental and climate in justices The collection of works balances theoretical empirical and practical aspects to address environmental and climate justice challenges through the lens of social justice This book gives voice to scholars of the Global South and uses an interdisciplinary approach to show the complexity of the problem and the opportunities for solutions making this book a powerful resource in teaching research and advocacy efforts The innovativeness of this approach stems from the use of narratives scientific explanation and thematic analysis to present the arguments in each chapter of this edited book Overall each chapter of this book acts as a powerful resource in teaching research and advocacy efforts This book fills a gap in the Global South production of environmental climate and social justice It provides in depth knowledge to the readers and raises their critical thinking about key elements discussions of justice issues of environmental conflicts and climate change The book is a useful read to a general audience interested in the topic of climate environment and development politics **Human Nature** Stephen Gislason, 2017-07-05 Preface Being a human is challenging Human life is a journey thorough time and space with many obstacles injury disease constant uncertainty and relentlessly difficult interactions with other humans Each human is the reincarnation of a long lineage of ancestors Species memory perceptual skills needs drives feelings desires and behaviors are built in and begin operating in utero Humans evolved from primate ancestors and retained features of mind and behavior that have been present in animals for hundreds of millions of years Urges desires designs feelings cry out from within and often surprise us as if we were the hosts to wild animals and spirits within that refuse to be identified or tamed Human behavior can be understood in relation to the whole spectrum of primate behaviors and social organizations Humans appear to have an eclectic combination of primate tendencies with elaboration of features such as tool making symbolic reasoning and spoken language Linda Stone suggested that Primates are a natural grouping of mammals that includes prosimians tree dwelling animals such as lemurs and tarsiers monkeys apes and humans Some of the physical characteristics that distinguish primates from other mammals are binocular vision and the grasping hand with mobile digits and flat nails Evolutionary trends characteristic of the Primate Order are most pronounced in humans and include prolongation of gestation of the fetus prolongation of the period of infant care and

expansion and elaboration of the brain An important feature in the social life of many nonhuman primates is dominance and the formation of dominance hierarchies a dominant animal wins aggressive encounters with others and usually has greater access to resources such as food water or sexual partners Rather than viewing society and culture as real things an observer can recognize that humans live in groups that repeat and modify innate behaviors to produce prolific variations on a few underlying themes that are common to all societies A smart observer will consider the grouping characteristics of humans and discern basic patterns and problems underlying the apparent complexity of modern civilization The organization of society begins with small local clusters that link family groups into clans that are more or less cooperative units Clans associate forming bands that tend to affiliate with other bands forming tribes looser affiliations that occupy larger geographic areas The band tribal structure emerges from ancient animal groupings Patterns of organization rules and institutions that regulate human behavior are in flux and will continue to be unstable As human populations expand and interactions become increasingly complex innate abilities are stretched and distorted The ability of individuals to relate to other humans remains limited and limits the effective management of enlarging groups Managers and leaders do not become smarter as the organizations they lead become larger It is axiomatic that organizations that exceed a threshold number become dysfunctional It is matter of empirical study to recognize group size thresholds and too little is known about the cognitive limitations of leaders
