The Social and Cultural Contexts of New Ceramic Technologies W. D. Kingery, 1993

The Social Life of Pots Judith A. Habicht-Mauche, Suzanne L. Eckert, Deborah L. Huntley, 2022-09-06 The demographic upheavals that altered the social landscape of the Southwest from the thirteenth through the seventeenth centuries forced peoples from diverse backgrounds to literally remake their worlds transformations in community identity and power that are only beginning to be understood through innovations in decorated ceramics In addition to aesthetic changes that included new color schemes new painting techniques alterations in design and a greater emphasis on iconographic imagery some of the wares reflect a new production efficiency resulting from more specialized household and community based industries Also they were traded over longer distances and were used more often in public ceremonies than earlier ceramic types Through the study of glaze painted pottery archaeologists are beginning to understand that pots had social lives in this changing world and that careful reconstruction of the social lives of pots can help us understand the social lives of Puebloan peoples In this book fifteen contributors apply a wide range of technological and stylistic analysis techniques to pottery of the Rio Grande and Western Pueblo areas to show what it reveals about inter and intra community dynamics work groups migration trade and ideology in the precontact and early postcontact Puebloan world The contributors report on research conducted throughout the glaze producing areas of the Southwest and cover the full historical range of glaze ware production Utilizing a variety of techniques continued typological analyses optical petrography instrumental neutron activation analysis X ray microprobe analysis and inductively coupled plasma mass spectroscopy they develop broader frameworks for examining the changing role of these ceramics in social dynamics By tracing the circulation and exchange of specialized knowledge raw materials and the pots themselves via social networks of varying size they show how glaze ware technology production exchange and reflected a variety of dynamic historical and social processes Through this material evidence the contributors reveal that technological and aesthetic innovations were deliberately manipulated and disseminated to actively construct communities of practice that cut across language and settlement groups The Social Life of Pots offers a wealth of new data

from this crucial period of prehistory and is an important baseline for future work in this area Contributors Patricia Capone Linda S Cordell Suzanne L Eckert Thomas R Fenn Judith A Habicht Mauche Cynthia L Herhahn Maren Hopkins Deborah L Huntley Toni S Laumbach Kathryn Leonard Barbara J Mills Kit Nelson Gregson Schachner Miriam T Stark Scott Van Keuren

Craft Production and Social Change in Northern China Anne P. Underhill, 2012-12-06 This book offers an anthropological analysis of how craft production changed in relation to the development of complex societies in northern China It focuses on the production and use of food containers pottery and bronze vessels during the late prehistoric and early historic periods A major theme is how production and use of prestige vessels changed in relation to increase in degree of social inequality The research and writing of this book took place intermittently over a period of several years When I first outlined the book in 1994 I planned to offer a more limited and descriptive account of social change during the late prehistoric period In considering the human desire to display status with prestige goods my initial approach emphasized how the case of northern China was similar to other areas of the world I began to realize that in order to adequately explain how and why craft production changed in ancient China it was crucial to consider the belief systems that motivated production and use of food containers Similarly a striking characteristic of ancient China that I needed to include in the analysis was the preponderance of food containers rather than other goods that were buried with the deceased I decided to investigate the social and ritual uses of food beverages and containers during more than one period of Chinese history Some strong patterns could have emerged during the late prehistoric period

Archaeological Anthropology James M. Skibo, Michael W. Graves, Miriam T. Stark, 2016-09 In this collection four generations of Longacre protégés show how they are building upon and developing but also modifying the theoretical paradigm that remains at the core of Americanist archaeology The contributions focus on six themes prominent in Longacre's career the intellectual history of the field in the late twentieth century archaeological methodology analogical inference ethnoarchaeology cultural evolution and reconstructing ancient society Analytical Archaeometry Howell Edwards, Peter Vandenabeele, 2016-01-13 Analytical Archaeometry describes this interesting and challenging field of research on the border between natural sciences chemistry spectroscopy biology geology and humanities archaeology art history conservation sciences It fills the gap between these two areas whilst focussing on the analytical aspects of this research field The first part of the book studies the main analytical techniques used in this research field The second part expands from the different types of materials usually encountered and the final part is organised around a series of typical research questions The book is not only focussed on archaeological materials but is also accessible to a broader lay audience Overall the book is clearly structured and gives insight into different approaches to the study of analytical providing extensive discussion on a wide range of techniques materials questions and applications Due to the advances in analytical instrumentation and applications in this field it is important to have all this information merged together Academics as well as professionals in archaeology art history museum labs and conservation science will find this an invaluable reference source ensuring the reader is provided with the latest progress in this research field
