It describes the experiences of interaction, friendship and play from children's own point of view as a way of giving insight into children's lives as they are lived and understood by them. Such an understanding serves to inform educational practice and aids the provision of more effective learning environments. *Autism and the Social World of Childhood* includes sections on the nature of play, social interaction and friendship in autism, the nature of children's ordinary social worlds including children's cultures of communication and variation in children's play, research approaches to investigating the social engagement of children with and without autism in natural contexts, educational approaches to supporting the integration of children with autism within a school setting, the importance of assessment in autism education. *Autism and the Social World of Childhood* includes real life descriptions of children's social experiences taken from ethnographic research into the play and interaction of children with and without autism.
