negotiability of statehood in Africa **Scheherazade Goes West** Fatima Mernissi,2001 For her book s inspired central metaphor Mernissi turns to the ancient Islamic tradition of oral storytelling illuminating her grandmother s feminized subversive and highly erotic take on Scheherazade s wife preserving tales from The Arabian Nights and then ingeniously applying them to her own lyrically embellished personal narrative Interwoven with vivid ruminations on her childhood her education and her various international travels are the author s piquant musings on a range of deeply embedded societal conditions that add up Mernissi argues to a veritable Western harem BOOK JACKET *Virtualism* James G. Carrier, Daniel Miller,2020-08-25 We live in a time of economic virtualism whereby our lives are made to conform to the virtual reality of economic thought Globalization transnational capitalism structural adjustment programmes and the decay of welfare are all signs of the growing power of economics one of the most potent forces of recent decades In the last thirty years economics has ceased to be just an academic discipline concerned with the study of economy and has come to be the only legitimate way to think about all aspects of society and how we order our lives Economic models are no longer measured against the world they seek to describe but instead the world is measured against them found wanting and made to conform This profound and dangerous change in the power of abstract economics to shape the lives of people in rich and poor countries alike is the subject of this interdisciplinary study Contributors show how economics has come to portray a virtual reality a world that seems real but is merely a reflection of a neo classical model and how governments the World Bank and the IMF combine to stamp the world with a virtual image that condemns as irrational our local social and cultural arrangements Further it is argued that virtualism represents the worrying emergence of new forms of abstraction in the political economy of which economics is just one example Water in a Changing World World Water Assessment Programme (United Nations),UN-Water,Unesco,2009-01-01 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world s freshwater resources It offers best practices as well as in depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies commissions program funds secretariats and conventions that have a significant role in addressing global water concerns

Development and Patronage Melakou Tegegn,1997 The authors represented in this collection argue that far from being a liberating process for all much of what has been done in the name of development has served to reinforce the intellectual material and financial dependence of those on the receiving end Some argue that the very concept of development is essentially a vehicle in which cultural values and social norms as well as resources are exported from one part of the world to another along a one way route from rich to poor Assistance Strategy for Mexico annotated bibliography *Routledge Handbook of Social Futures* Carlos López Galviz,Emily Spiers,2021-11-22 Featuring chapters from an international range of leading and emerging scholars this Handbook provides a collection of cutting edge interdisciplinary research that sheds new

light on contemporary futures studies Engaging with key defining questions of the early twenty first century such as climate change big data AI the future of economics education mental health cities and more the Handbook provides a review and synthesis of futures scholarship highlighting the role that societies can and should play in their making While the various chapters demonstrate how futures emerge and take shape in particular places at particular times the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual By presenting a range of futures work from contexts around the globe the Handbook contextualizes techniques forecasting backcasting scenario planning collaboration and co production to ask how different dimensions of the social are created and circulated in the process Through its thirty chapters the volume explores and interrogates narratives anticipations enactments ecologies collaborations prospectations and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed This Handbook opens an important conversation about the centrality of the social in futures thinking By bringing arts humanities and social sciences scholars and practitioners into conversation with biologists environmental climate and computer scientists this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere
