Water Policy and Management in Spain Francisco González-Gómez, Miguel A. García-Rubio, Jorge Guardiola, 2016-04-08 Spain is facing an increasingly difficult situation in terms of water stress This is an issue that is due mostly to poor management practices in all sectors Large amounts of water have been used for agricultural purposes at very low prices for too long there is an uncontrolled use of most aquifers in rural areas which result from ineffective control by the public administration per capita consumption continues increasing as well as water used for industrial and energy generation the construction and tourism sectors and for recreation activities In fact they have all exerted additional pressure on available water resources In order to face the above challenges water policy has made a gradual shift towards more rational and sustainable management of water resources This has also been influenced by the European Water Framework Directive about which as the book discusses there are both myths and misunderstandings This book analyses the very complex position of all sectors in the country the alternatives available and the challenges ahead In so doing it makes an important contribution to the literature on water resources management This book was published as a special issue of the International Journal of Water Resources Development

Facing the Challenges of Water Governance Simon Porcher, Stéphane Saussier, 2018-11-19 Access to water is one of the most pressing global issues of the twenty first century particularly when set against the background of a rapidly growing global population This book provides a cutting edge comprehensive overview of the challenges facing water governance and regulatory choices The recently adopted Sustainable Development Goals set forward an ambitious agenda of providing

universal access to good quality water supply and sanitation services within a financially constrained environment however the various peculiarities of each country regarding water governance makes it difficult to identify and implement the best practices and benchmarks Drawing together empirical studies from countries around the world the editors and contributors combine extensive data to review the individual challenges facing each country from the supervision of autonomous regulatory bodies to the question of centralization and the influence of local utility companies This pioneering and practical volume will be of interest and value not only to students and scholars of water governance but also to practitioners and regulators

OECD Environmental Strategy 2004 Review of Progress OECD,2004-04-20 This report assesses the progress that OECD countries have made in implementing objectives set out in an Environmental Strategy adopted in 2001 as well as in applying the 71 national actions they agreed as part of that Strategy
