Social Integration In The Second Half Of Life:

Social Integration in the Second Half of Life Karl Pillemer, Phyllis Moen, Elaine Wethington, Nina Glasgow, 2003-05-01
Social scientists use the term social integration to refer to individuals' connections with others in their environments. The concept and its consequences have been the subject of considerable study. Many researchers have asserted that meaningful and enduring ties to other persons serve as a buffer against stress and thereby promote physical and mental health. The results are especially pronounced for older persons. *Social Integration in the Second Half of Life* presents integrative reviews of theory and research on this topic. The editors and contributors all currently or previously affiliated with the Cornell Gerontology Research Institute also present new empirical findings of research done at their center. The first section of the book discusses basic theory and principles of social integration in later life and its implications for health. The second largest section examines specific issues: retirement, driving, family support, housing, neighbors. The third section addresses interventions to promote social integration: transportation, volunteering, and peer support for dementia caregivers. Throughout, the authors focus on the diverging influences of social integration and its converse, social isolation in later life. **Social**

Integration in the Second Half of Life Karl Pillemer, 2000-11-24 Pillemer and colleagues in their excellent review of social integration at the threshold of the 21st century document the problems of mid-lifers and elders as they seek social integration that is a life with people. *The Gerontologist* *Handbook of the Life Course* Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14 This comprehensive handbook provides an overview of key theoretical perspectives, concepts, and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases. In surveying the wide terrain of life course studies with dual emphases on theory and empirical research, this important reference work presents probative concepts and methods and identifies promising avenues for future research.

Mental Health And Well Being In Later Life Cattan, Mima, 2009-05-01 Offers a look at the mental health and well-being issues that affect adults in later life. Taking a holistic approach to mental health and mental health promotion, this book explores the debates around what is meant by mental health and mental illness and the wider social determinants of mental health. *Residential Choices and Experiences of Older Adults* John A. Krout, PhD, Elaine Wethington, PhD, 2003-06-10 Based on the Pathways to Life Quality longitudinal research study, this book explores the ways in which older adults' residential choices impact their health and well-being. The study examines the factors associated with life quality for persons living on their own in the local community as well as those in various housing arrangements such as a continuing care retirement facility, adult home, income-subsidized housing, and senior apartments. Topics include plans and adjustment to moving, role identities, social relationships, participation and integration, health and activity patterns, and coping with life events. **The Experience of Retirement** Robert S. Weiss, 2018-05-31 Retirement brings with it the promises of leisure and freedom as well as the risks of boredom and isolation. When retirees rid their schedules of anything resembling the kinds

of obligations that once had been imposed by work they will experience a sometimes uncomfortable absence of structure In *The Experience of Retirement* the distinguished sociologist Robert S Weiss provides a detailed description of how some people plan their retirement what life in retirement is like and what makes for a fulfilling retirement His engaging book can thus serve as a most useful guide Weiss shows us both retirement's benefits and its possible costs both the relief retirees can feel once free of work's stresses and constraints and the discomfort that can be caused by loss of the positive aspects of working life The book is based on extensive interviews with eighty nine men and women before and after their retirement from middle income careers Weiss makes vivid their experiences by presenting in their own words their descriptions of leaving their careers considering what to do with their time confronting issues of income in retirement dealing sometimes with social isolation and reorganizing their lives The interviews reveal the way in which retirement affects marriages and other familial relationships Weiss concludes by presenting advice about retirement based on the actual experiences of retirees For anyone approaching the age of retirement or already retired and looking for a more satisfying post career life for personnel managers health care professionals and all those who provide services for the retired *The Experience of Retirement* will be an illuminating guidebook to this phase of life

Social Networks and the Life Course Duane F. Alwin,Diane H. Felmlee,Derek A. Kreager,2018-03-06 This volume engages the interface between the development of human lives and social relational networks It focuses on the integration of two subfields of sociology social science the life course and social networks Research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks At the same time life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and linked to one another through social networks These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span from childhood and adolescence to midlife through old age

Civic Engagement in Later Life Rodrigo Serrat,2025-05-29 Available open access digitally under CC BY NC ND licence Older adults civic engagement has become a key concern in academic and policy debates in recent years However existing studies on this topic remain fragmented across various conceptual and methodological approaches This book provides a comprehensive interdisciplinary and multidimensional perspective on older adults civic engagement It proposes a conceptual framework which understands civic engagement as a multidimensional concept encompassing a diversity of activities through which older adults contribute to their communities and wider society Contributors explore the factors shaping older adults participation in various civic activities across the life course considering their diversity in terms of social locations such as gender health status migrant background socioeconomic background and residential arrangements By analysing past and current research policy and practice the book offers recommendations for future efforts to advance the field
