Vaughn,Ann E. Killebrew,2003 What are archaeologists and biblical scholars saying about Jerusalem This volume includes the most up to date cross disciplinary assessment of Biblical Jerusalem ca 2000 586 B C E that represents the views of biblical historians archaeologists Assyriologists and Egyptologists The archaeological articles both summarize and critique previous theories as well as present previously unpublished archaeological data regarding the highly contested interpretations of First Temple Period Jerusalem The interpretative essays ask the question Can there be any dialogue between archaeologists and biblical scholars in the absence of consensus The essays give a clear yes to this question and provide suggestions for how archaeology and biblical studies can and should be in conversation This book will appeal to advanced scholars nonspecialists in biblical studies and lay audiences who are interested in the most recent theories on Jerusalem The volume will be especially useful as a supplemental textbook for graduate and undergraduate courses on biblical history **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1955 *Government and Society in Rural Palestine, 1920-1948* Ylana Miller,2014-07-03 In 1947 Arabs made up two thirds of the population of Palestine and they owned most of its cultivable land Why then did they lose their homes and land to a relatively small Jewish community just emerging from the shocks of World War II Did the Palestinians lose their homeland because they were backward primitive and reactionary Or was Israel the product of persistent victimization of Palestinian Arabs by an imperialist power which supported Zionist colonization Did the Palestinians sell each other out Or were they helpless sufferers in the face of a

sophisticated enemy with endless resources Too often discussions of Palestine are couched in such rhetorical language based on the assumption that either Jews or Arabs are morally to blame for historical realities This study seeks to go beyond attributions of responsibility to investigate the concrete conditions which determined and limited Palestinian Arab actions between 1920 and 1948 It was during that period while Great Britain governed the area under a League of Nations mandate that Palestine both emerged and disappeared as a modern political entity Many studies of Palestinian Arab nationalism have looked to Zionism as the primary agent of change in the region Miller assumes the impact of Jewish settlement but goes beyond these earlier studies to explore the way in which policies of the Palestine government affected the daily lives of villagers the majority of the population and their understanding of the changes occurring around them In this way what emerges is a detailed analysis of the influence for good or ill that government policy had on village community life Based largely on archival sources never before used this work allows the reader to gain a deeper appreciation of the internal life of the rural community which had previously received relatively little attention Understanding the experiences of Palestinians before 1948 helps us to comprehend immeasurably better the continuity of movements for Palestinian statehood as well as the continuing tensions and problems on the West Bank today

A Lebanese Perspective Simone Kosremelli, Sylvia Shorto, 2011 For the past 30 years Simone Kosremelli has produced an architecture known for its character and its outstanding quality Volumetrically complex internally and visually coherent externally her work is rooted in the Lebanese vernacular but it is not constrained by the past Rather her designs incorporate vernacular elements in modern arrangements encouraging the natural continuation of a local architectural vocabulary and the preservation of time honoured building techniques Kosremelli also designs simple yet carefully detailed interiors that combine hints of the past with modern materials for a contemporary outlook This the first monograph devoted to her firm's work offers a beautifully illustrated tour through a selection of her most exceptional projects

The Little Community and Peasant Society and Culture Robert Redfield, 1989-03-15 This volume combines two classic works of anthropology The Little Community draws on the author's own notable studies of the villages of Tepoztlan and Chan Kom to explore the means by which scientists try to understand human communities It contains wrote Margaret Mead the essence of Robert Redfield's multifaceted contributions to the place of community studies in social science Peasant Society and Culture outlines a speculative foundation for the emergence of anthropology from the study of isolated primitive tribes

Current Developments in Anthropological Genetics Michael H. Crawford, James H. Mielke, 2012-12-06 This volume examines the interrelationship of ecology subsistence patterns and the observed genetic variation in human populations Hence the book is divided conceptually into the following categories nonhuman primates hunters and gatherers nomads swidden agriculturalists peasant farmers religious isolates and modern and urban aggregates While many of these populations have experienced and are experiencing acculturation as a result of contact with technologically more advanced groups the genetic structures described in this volume attempt to

reconstruct the traditional patterns as well as genetic changes because of contact. Most chapters also integrate biological, genetic, social, and demographic data within an ecological frame, thus presenting a holistic view of the population structures of ecologically distinct groups. The first chapter examines the body of early nonhuman primate literature that emphasized ecological determinism in effecting the population structure of our primate ancestors' relatives. It also examines more recent literature since 1970 in which it became apparent that greater flexibility exists in primate social structure within specific environmental frameworks. Thus it appears that our nonhuman primate evolutionary heritage is not one of ecological determinism in social organization but one of flexibility and rapid change, suggesting the evolutionary success of our species is based upon a system of flexibility and that social adaptations can be accomplished in a number of diverse ways.

The Middle East and Brazil Paul Amar, 2014-07-15. Connections between Brazil and the Middle East have a long history, but the importance of these interactions has been heightened in recent years by the rise of Brazil as a champion of the global south, mass mobilizations in the Arab world and South America, and the cultural renaissance of Afro-descendant Muslims and Arab ethnic identities in the Americas. This groundbreaking collection traces the links between these two regions, describes the emergence of new South-South solidarities, and offers new methodologies for the study of transnationalism, global culture, and international relations. *Pluralism and Party Transformation in Lebanon* Entelis, 2022-04-25. *Sharaf Politics* Sharon D. Lang, 2013-10-18. This book examines the Arabic conflict resolution method known as *sulha*. In this process, notable male elders mediate conflicts between and within Arab communities. A lengthy process of political jockeying culminates in a ceremony that peaks when enemies shake hands and publicly forgive the crimes of the other. The reality of actual *sulha* deviates considerably from the ideal, but both the official framework and the actual events point to a deep-seated valorization of peace and reconciliation in Israeli-Palestinian society.
