Social Justice and the City Nik Heynen, 2020-06-09 This special collection aims to offer insight into the state of geography on questions of social justice and urban life While using social justice and the city as our starting point may signal inspiration from Harvey's 1973 book of the same name the task of examining the emergence of this concept has revealed the deep influence of grassroots urban uprisings of the late 1960s earlier and contemporary meditations on our urban worlds Jacobs 1961 1969 Lefebvre 1974 Massey and Catalano 1978 as well as its enduring significance built upon by many others for years to come Laws 1994 noted how geographers came to locate social justice struggles in the city through research that examined the ways in which material conditions contributed to poverty and racial and gender inequity as well as how emergent social movements organized to reshape urban spaces across diverse engagements including the U S Civil Rights Movement anti war protests feminist and LGBTQ activism the American Indian Movement and disability access This book

The Struggle for Social Justice in British Columbia Irene Howard, 2011-11-01 Helena Gutteridge was a socialist and feminist whose vision helped to shape social reform legislation in British Columbia in the first decades of the twentieth century and also one of the first women there to hold high political office She was born in England in 1879 A militant suffragist tutored by the Pankhursts she learned the politics of confrontation early Emigrating to Vancouver in 1911 she found the suffrage movement there too polite and organized the B C Woman s Suffrage League to help working women fight for the vote And she kept on organizing As a journeyman tailor she was a power in her union local and as the only woman on the Vancouver Trades and Labor Council their rebel girl she championed the rights of workers and organized women to fight for themselves In the 1930s as a member of the feisty new political movement the Co operative Commonwealth Federation she joined in the struggles of the unemployed for work and wages Then in 1937 as the first woman ever elected to Vancouver City Council she led the fight for low income housing As was typical for women of her class and time Helena did not keep personal records nor did organizational records exist to any extent Irene Howard made it her task over a period of years to search out and assemble details of Helena s life and career and to interview old comrades who knew Helena and the turbulent times in which she lived Herself a miner s daughter the author brings to her subject an affectionate regard and sympathy qualified by the larger view of the scholar and researcher The result is a lively biography shot through with humour and pathos that pays homage to Helena Gutteridge and to many of the people who have been inspired by a cause and who have taught us about the politics of caring

Beyond the Networked City Olivier Coutard, Jonathan Rutherford, 2015-12-14 Cities around the world are undergoing profound changes In this global era we live in a world of rising knowledge economies digital technologies and awareness of environmental issues The so called modern infrastructural ideal of spatially and socially ubiquitous centrally governed infrastructures providing exclusive homogeneous services over extensive areas has been the standard of reference for the provision of basic essential services such as water and energy supply This book argues that after decades of undisputed domination this ideal is being increasingly questioned and that the network ideology that supports it may be waning In order to begin exploring the highly diverse fluid and unstable landscapes emerging beyond the networked city this book identifies dynamics through which a break with previous configurations has been operated and new brittle zones of socio technical controversy through which urban infrastructure and its wider meaning are being negotiated and fought over It uncovers across a diverse set of urban contexts new ways in which processes of urbanization and infrastructure production are being combined with crucial sociopolitical implications through shifting political economies of infrastructure which rework resource distribution and value creation through new infrastructural spaces and territorialities which rebundle socio technical systems for particular interests and claims and through changing offsets between individual and collective appropriation experience and mobilization of infrastructure With contributions from leading authorities in the field and

drawing on theoretical advances and original empirical material this book is a major contribution to an ongoing infrastructural turn in urban studies and will be of interest to all those concerned by the diverse forms and contested outcomes of contemporary urban change across North and South **Social Reproduction and the City** Simon Black, 2020

The transformation of child care after welfare reform in New York City and the struggle against that transformation is a largely untold story In the decade following welfare reform despite increases in child care funding there was little growth in New York's unionized center based child care system and no attempt to make this system more responsive to the needs of working mothers As the city delivered child care services on the cheap relying on non union home child care providers welfare rights organizations community legal clinics child care advocates low income community groups activist mothers and labor unions organized to demand fair solutions to the child care crisis that addressed poor single mothers need for quality affordable child care as well as child care providers need for decent work and pay *Social Reproduction and the City* tells this story linking welfare reform to feminist research and activism around the crisis of care social reproduction and the neoliberal city At a theoretical level Simon Black's history of this era presents a feminist political economy of the urban welfare regime applying a social reproduction lens to processes of urban neoliberalization and an urban lens to feminist analyses of welfare state restructuring and resistance Feminist political economy and feminist welfare state scholarship have not focused on the urban as a scale of analysis and critical approaches to urban neoliberalism often fail to address questions of social reproduction To address these unexplored areas Black unpacks the urban as a contested site of welfare state restructuring and examines the escalating crisis in social reproduction He lays bare the aftermath of the welfare to work agenda of the Giuliani administration in New York City on child care and the resistance to policies that deepened race class and gender inequities *The Spatial Logic of Social Struggle* Nikolaus Fogle, 2011-04-07

Pierre Bourdieu's theory of practice is widely regarded as among the most innovative and illuminating fruits of recent social thought As evidence mounts that the spatial turn in the social sciences and humanities is no mere theoretical fad but rather an enduring paradigm of social and cultural research Bourdieu's status as a profoundly spatial thinker takes on a renewed importance *The Spatial Logic of Social Struggle* A Bourdieuan Topology focuses on Bourdieu's philosophy of space arguing that space is at once a condition for social knowledge a methodological instrument and a physical context for practice By considering Bourdieu's theory of social space and fields alongside his several accounts of socially potent physical spaces Nikolaus Fogle develops an understanding of the systematic co determinations between social and physical space He traces Bourdieu's ideas about the spatiality of social life through his investigations of Algerian peasant villages and Gothic cathedrals as well as spaces of class lifestyle and cultural creation revealing that social and environmental struggles are only logical insofar as they are topological He also demonstrates how a Bourdieuan dialectical understanding of social and physical space can be brought to bear on contemporary issues in architecture and urban development This book will be useful and accessible not only to philosophers

but also to architects geographers sociologists and other scholars in the social sciences and humanities who take an interest in the social theory of space
