VanFossen, Michael J. Berson, 2008 In 1991 Lawrence Grossman wrote that a new political system is taking shape in the United States As we approach the twenty first century America is turning into an electronic republic a democratic system that is vastly increasing the people s day to day influence on decisions of state Grossman s forecast implied a sea change in the way citizens would interact with and participate in their representative government a revamping of the way Americans would do citizenship Harnessing the power of technology to promote the ideal of democracy that first pulsed through our nation over 230 years ago may be a feasible achievement in a technocratic age but whether technology can help achieve a revolution as seismic as the political one that our founding fathers initiated may be a practical impossibility Fusing the power of technology and democratic ideals opens opportunities for greater access to information and offers a medium for people to be heard and express their voice with dissemination to the masses through digital tools such as blogs podcasts and wikis Indeed the emergence of the Internet as a nearly ubiquitous element of American society has brought about new opportunities to enhance citizen engagement in democratic politics and to increase the level of civic engagement among American citizens Despite such rhetoric however research has indicated that Grossman s electronic republic has for the most part failed to come to fruition *Integrative Strategies for the K-12 Social Studies Classroom* Timothy Lintner, 2013-03-01

While the concept of integration or an interdisciplinary curriculum has been around for decades the purposeful practice of integration is a relatively new educational endeavor Though classroom teachers often say they integrate there generally seems to be a lack of understanding of what this thing called integration is theory and what it is supposed to look like in the classroom practice Arguably no other discipline has felt the pressure to integrate more than social studies Marginalized by federal initiatives such as No Child Left Behind and suffering from a general crisis of credibility social studies has been pushed further and further to the proverbial back burner of educational importance Yet regardless of perspective or position social studies remains ripe for integration The crux of this book is to provide educators insights and strategies into how to integrate social studies with other discipline areas Calling upon national experts in their respective fields each chapter chronicles the broad relationship between individual content areas and social studies Multiple examples of integrative

opportunities are included At the end of each chapter is a series of grade specific integrative lesson plans ready for implementation This book was purposefully designed as a how to hands on ready reference guide for educators at all stages and all levels of teaching      Social Studies in Elementary Education Walter C. Parker,2015-03-20 The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind to present the most powerful social studies content and pedagogy for children in elementary school to offer the material in simple and accessible ways and to write in a first person active voice The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools Geography history government and the other social sciences are delivered into the palm of the new teacher s hand along with a suite of tools for bringing social studies to life in the classroom The book is organized into three sections the first orients the reader to the mission of social studies education to the increasingly diverse children we teach the second concentrates on the curriculum and the third deals with instruction how we plan and teach this curriculum Three central themes continue to pervade the book democratic citizenship diversity and the social sciences to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals An exceptionally strong chapter on multicultural issues Chapter 2 helps future teachers truly understand the changing demographics of the American classroom      *Teaching for Citizenship in Urban Schools* Antonio J. Castro,Alexander Cuenca,Jason Williamson,2020-03-01 As the civic engagement gap widens across lines of race class and ethnicity educators in today s urban schools must reconsider what it means to teach for citizenship however few resources exist that speak to their unique contexts Teaching for Citizenship in Urban Schools offers lessons and strategies that combines the power of inquiry driven teaching with a funds of knowledge approach to capitalize on the lived civic experiences of urban youth and children Teaching for Citizenship in Urban Schools presents six strategies for making civic and social studies education relevant and engaging using photovoice for social change conducting culturally responsive investigations of community defining American Black founders enacting hip hop pedagogy employing equity literacy to explore immigrant enclaves and drawing on young adult fiction to teach about police violence Written by some of the leading scholars in the field each chapter includes an overview of the strategy and lessons for both elementary and secondary students As a whole these lessons draw on neighborhood resources facilitate cultural exchanges among students and teachers create community networks and bridge schools and communities in a shared mission of building a just and inclusive democracy This book is for anyone who values student centered inquiry driven and culturally sustaining pedagogies that foster a deeper understanding of citizenship within a diverse democracy      *Technology in Retrospect* Richard A. Diem,Michael J. Berson,2010-06-01 January 2009 marked the 25th anniversary of one of the most famous three minutes of television history It was during half time of the 1984 Super Bowl that APPLE show cased its new Macintosh Computer in an avant guard commercial In the following three weeks sales of the new computer in both the public and private sectors took

off leading some to note this occasion as the true start of the information age At the same time schools joined this so called information revolution and began to use the new technology in various forms in a much more serious manner Given both the changing nature of technology as well as its classroom applications over the past quarter century this work s goal is to capture the historical trends of both use and application of information technology in the social studies during this era This is done by providing a retrospective view from 1984 through 2009 of where we ve been where we are and a view of new tools and strategies and possible studies that are emerging that can enhance our understanding of the effects that technology has and will have on the social studies      Enhancing Student Learning in Middle School Martha Casas,2010-09-13 A
