The Theory of Communicative Action Jürgen Habermas, 2015-10-07 Here for the first time in English is volume one of Jürgen Habermas's long awaited magnum opus *The Theory of Communicative Action*. This pathbreaking work is guided by three interrelated concerns: 1 to develop a concept of communicative rationality that is no longer tied to the subjective and individualistic premises of modern social and political theory; 2 to construct a two level concept of society that integrates the lifeworld and system paradigms; and 3 to sketch out a critical theory of modernity that explains its sociopathologies in a new way. Habermas approaches these tasks through a combination of conceptual analyses, systematic reflections, and critical reconstructions of such predecessors as Marx and Weber, Durkheim and Mead, Horkheimer and Adorno, Schutz and Parsons. *Reason and the Rationalization of Society* develops a sociological theory of action that stresses not its means ends or teleological aspect but the need to coordinate action socially via communication. In the introductory chapter Habermas sets out a powerful series of arguments on such foundational issues as cultural and historical relativism, the methodology of *Verstehen*, the inseparability of interpretation from critique. In addition to clarifying the normative foundations of critical social inquiry, this sets the stage for a systematic appropriation of Weber's theory of rationalization and its Marxist reception by Lukács, Horkheimer and Adorno. This is an important book for degree students of philosophy, sociology and related subjects.

Rationality and the Environment Bo Elling,2012 Environmental assessment and management involve the production of scientific knowledge and its use in decision making processes The result is that within these essentially rational political assessment frameworks experts are creating and applying scientific knowledge for decision and management purposes that actually have strong ethical and aesthetic dimensions Yet these rational political frameworks lack the tools to provide guidance on ethical and aesthetic issues that affect the wider public This revolutionary work argues that ethical and aesthetic dimensions can only be brought into environmental politics and policies by citizens actively taking a stand on the specific matters in question The author draws on Habermas trisection of rationality as cognitive instrumental moral practical and aesthetic expressive to suggest that truly effective environmental policy needs to activate all three approaches and not favour only the rational To achieve this objective the author argues that public participation in environmental policy and assessment

is necessary to counteract the dictatorship of technical and economic instrumentality in environmental policy the failure to take ethical and aesthetic rationalities into account and more importantly how such policy is applied on the ground to shape our natural and material world The Information Society as Post-industrial Society Yoneji Masuda,1981 Society to an information Society Economics as a Social Science Raimund Dietz,2024-09-30 This book explores the separation of economics from the social sciences Raimund Dietz attributes this development to the adoption of a too narrow instrumentalist perspective and demonstrates how close the mainstream is to the idea of a socialist planned economy despite all its liberal phraseology The book attempts to comprehensively reconstruct economics as catallactics explicitly including and assigning a central role to liberal forms of socialization such as exchange and money an approach that it argues is the only way to overcome the methodological deficits of the mainstream It allows monetary theory to be integrated into economic theory Further the book shows that modern societies have no choice but to organize themselves as capitalist market economies For good economic reasons money has lost its physical value over the course of time and is now merely symbolic As a result the importance of the state has also grown The author proposes that the power to create money should be consistently placed in the hands of the central bank The book offers a transformative perspective that addresses the urgent need for sustainable resource management worldwide It invites social scientists policymakers and especially economists to rethink economics and pursue a holistic approach to a more sustainable future Challenging Conventions Christiane Czygan,Hatice Aynur,2025-06-30 As the core theme of Early Modern Ottoman poetry love inspired a plethora of Turkish research the most enlightening of which explored questions of terminology semantics and mystic dimensions Internationally however there have been few publications on this subject This book closes this gap by investigating in different genres and contexts Whereas the terms *ubb* and *ma abbet* point to comfort and care the term *denet* denotes passionate love often laced with mystical connotations Through this lens we show that Ottoman lyrical realities transgressed the rules burgeoning beyond conventional settings and giving voice to vivid creativity Large parts of urban society indulged in poetry and thereby challenged certain norms Methods of Critical Discourse Analysis Ruth Wodak,Michael Meyer,2001 This book is designed as an introduction to Critical Discourse Analysis CDA and gives an overview of the various theories and methods associated with this sociolinguistic approach It also introduces the reader to the leading figures in CDA and the methods to which they are most closely related The text aims to provide a comprehensive description of the individual methods an understanding of the theories to which methods refer and a comparative treatment of each of these methods so that students may be able to determine which is the most appropriate to select for their particular research question Given the balance between theory and application plus the intended audience no previous knowledge of CDA is assumed Methods of Critical Discourse Analysis should be useful reading for both students and researchers in the fields of linguistics sociology social psychology and the social sciences in general The Perils of the One Stathis Gourgouris,2019-07-30 From the earliest times societies have

been seduced by the temptation of unitary thinking Recognizing the vulnerability of existence people and cultures privilege regimes that confer authority on a single entity a sovereign ruler a transcendental deity or an Event which they embrace with unquestioned devotion Such obsessions precipitate contempt for the worldliness of real bodies in real time and refusal of responsibility and agency In *The Perils of the One* Stathis Gourgouris offers a philosophical anthropology that confronts the legacy of monarchical thinking the desire to subjugate oneself to unitary principles and structures whether political moral theological or secular In wide ranging essays that are at once poetic and polemical intellectual and passionate Gourgouris reads across politics and theology literary and art criticism psychoanalysis and feminism in a critique of both political theology and the metaphysics of secularism He engages with a range of figures from the Apostle Paul and Trinitarian theologians to La Bo tie Schmitt and Freud to contemporary thinkers such as Clastres Said Castoriadis i ek Butler and Irigaray At once a broad perspective on human history and a detailed examination of our present moment *The Perils of the One* offers glimpses of what a counterpolitics of autonomy would look like from anarchic subjectivities that refuse external ideals resist the allure of command and obedience and embrace otherness

Family Ties and Psychosocial Processes in an Ageing Society Alejandro Klein,2024-05-10 This book contributes to the discussion on the ageing society by addressing the new psycho social structures of the ageing society the problems around family bonds and ties and the structures of care and protection The book sheds light on the new roles of grandparents and new grandparents and the empowerment and resilience initiatives thereby providing a broad discussion of what the ageing society implies in psychosocial terms These issues are addressed in an interdisciplinary way but also in an approach that is also rare comparing different realities between Europe and Latin America The basis of the English translation of this book from its Spanish original manuscript was done with the help of artificial intelligence A subsequent human revision of the content was done by the author

Spaces and Identities in Border Regions Christian Wille,Rachel Reckinger,Sonja Kmec,Markus Hesse,2015-11-17 Spatial and identity research operates with differentiations and relations These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge Applying this approach the authors of this volume investigate spatial and identity constructions in cross border contexts as they appear in everyday institutional and media practices The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation The studies base upon empirical surveys conducted in Germany France Belgium and Luxembourg
