**Volume 1** Alexander Bergs, Laurel J. Brinton, 2012-05-29 No detailed description available for HIST LINGUISTICS BERGS BRINTON 1 TLBD HSK 34 1 E BOOK      *Modern Arabic Sociolinguistics* Abdulkafi Albirini, 2016-02-08 Modern Arabic Sociolinguistics outlines and evaluates the major approaches and methods used in Arabic sociolinguistic research with respect to diglossia, codeswitching, language variation and attitudes and social identity. This book outlines the main research findings in these core areas and relates them to a wide range of constructs including social context, speech communities, prestige, power, language planning, gender and religion. Examines two emerging areas in Arabic sociolinguistic research: internet-mediated communication and heritage speakers in relation to globalization, language dominance and interference, and language loss and maintenance. Analyses the interplay between the various sociolinguistic aspects and examines the complex nature of the Arabic multidialectal, multinational and multiethnic sociolinguistic situation. Based on the author's recent fieldwork in several Arab countries, this book is an essential resource for researchers and students of sociolinguistics, Arabic linguistics and Arabic studies.

**Corpus-based Research in Applied Linguistics** Viviana Cortes, Eniko Csoma, 2015-01-14 This volume comprises nine contributions that were written by up-and-coming corpus-based researchers with varied areas of expertise who were all disciples of Douglas Biber sometime in the past two decades. These papers cover a wide variety of linguistic analyses and describe the principles of the Flagstaff school: a careful procedure for language corpora collection with special consideration for corpus size, representativeness, sampling and systematic analysis; the use of computer programming abilities that allow the posing of corpus-based research questions never asked before; and a strong emphasis on the combination of quantitative methods based on sound and innovative statistical procedures complemented with comprehensive qualitative functional analyses of the language. This volume has been edited in honor of Douglas Biber, a pioneer of the American school of corpus-based research.

Challenges for Language Education and Policy Bernard Spolsky, Ofra Inbar-Lourie, Michal Tannenbaum, 2014-09-15 Addressing a wide

range of issues in applied linguistics, sociolinguistics and multilingualism, this volume focuses on language users—the people. Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and

language theories, suggesting new meeting points among language users and language policy makers, norms and traditions in diverse cultural, geographical and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think out of the box and to reconsider some basic commonly held understandings specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

**Sociolinguistics and Language History** Terttu Nevalainen, Helena

Raumolin-Brunberg, 2023-11-27 What role has social status played in shaping the English language across the centuries? Have women also been the agents of language standardization in the past?

Can apparent time patterns be used to predict the course of long term language change? These questions and many others will be addressed in this volume which combines sociolinguistic methodology and social history to account for diachronic language change in Renaissance English. The approach has been made possible by the new machine readable Corpus of Early English Correspondence (CEEC) specifically compiled for this purpose.

The 2.4 million word corpus covers the period from 1420 to 1680 and contains over 700 writers. The volume introduces the premises of the study, discussing both modern sociolinguistics and English society in the late medieval and early modern periods.

A detailed description is given of the Corpus of Early English Correspondence, its encoding and the separate database which records the letter writers' social backgrounds. The pilot studies based on the CEEC suggest that social rank and gender should both be considered in diachronic language change, but that apparent time patterns may not always be a reliable cue to what will happen in the long run. The volume also argues that historical sociolinguistics offers fascinating perspectives on the study of such new areas as pragmatization and changing politeness.

cultures across time This extension of sociolinguistic methodology to the past is a breakthrough in the field of corpus linguistics It will be of major interest not only to historical linguists but to modern sociolinguists and social historians
