*and Sociological Foundation of Education* Hans, Emmanuel, 2024-10-03 The intersection of philosophy and sociology within the realm of education is a dynamic field that offers profound insights into the fundamental principles and practices shaping educational systems globally. By examining the philosophical underpinnings of education, we gain a deeper understanding of how educational environments are influenced and constructed. This interdisciplinary approach not only enriches theoretical discussions but also has practical implications for curriculum development, policymaking, and the fostering of equitable and inclusive learning experiences. Educational Philosophy and Sociological Foundation of Education provides a comprehensive understanding of educational philosophy and its sociological underpinnings. Through a series of chapters authored by experts in the field, this book delves into various philosophical concepts and their implications for educational practices, while also exploring the sociological dimensions influencing educational systems. Covering topics such as academic achievement, outcome-based education, and universal design, this book is an excellent resource for graduate and postgraduate students, educators, researchers, policymakers, academicians, administrators, sociologists, and more.

*The Foundations of Education* Both Philosophical and Sociological the purpose of which is to provide an all-encompassing knowledge of the educational system's philosophical and social facets. Education is built on a foundation of philosophical principles. It is possible to state that it is the mother of education since the form of education is thought to have developed from the philosophy of life. This book offers a broad spectrum of key subjects that are all connected. The process of education is ever-changing. It shifts as a result of changes in sociopolitical and economic situations, a result of the explosion of information, and a result of the great social transformation that has taken place over the years. Alteration is one of the most defining features of Mother Nature. The role of the Teacher is similar to that of a philosopher in that the Teacher attempts to shape and grow the kid in accordance with his philosophy to achieve the desired kind of person. This focus and elevated thinking are to illuminate the mysterious and eternal aspects of reality. This book is an effort to give readers a study that is both thorough and understandable of many parts of the Philosophical and Sociological Foundations of Education.
