hybrid **For We Are Young And . . . ?** Sally Beadle, Roger Holdsworth, Johanna Wyn, 2011-03-15 For we are young and offers a provocative perspective on Australia's young people against a global and local backdrop of uncertainty and change. It asserts the importance of a critically informed and positive approach to youth, moving beyond seeing young people through the lens of shortcomings and problems to be solved. For we are young and draws directly on the work of the Youth Research Centre at The University of Melbourne and its legacy of innovative and significant research on young Australians. Opening with the theoretical context of youth research, the book draws on contemporary examples to discuss new conceptual and research approaches, the ways in which young people participate in change, and the challenges and possibilities that are presented by current conditions. For we are young and identifies emerging issues and future directions for youth research policy and professional practice.

Thinking Through Methods John Levi Martin, 2017-02-08 Sociological research is hard enough already; you don't need to make it even harder by smashing about like a bull in a china shop, not knowing what you're doing or where you're heading. Or so says John Levi Martin in this witty, insightful, and desperately needed primer on how to practice rigorous social science. Thinking Through Methods focuses on the practical decisions that you will need to make as a researcher: where the data you are working with comes from and how that data relates to all the possible data you could have gathered. This is a user's guide to sociological research designed to be used at both the undergraduate and graduate level. Rather than offer mechanical rules and applications, Martin chooses instead to team up with the reader to think through and with methods. He acknowledges that we are human beings and thus prone to the same cognitive limitations and distortions found in subjects and proposes ways to compensate for these limitations. Martin also forcefully argues for principled symmetry, contending that bad ethics makes for bad research and vice versa. Thinking Through Methods is a landmark work, one that students will turn to again and again throughout the course of their sociological research.

Sociology Albion W. Small, Ellsworth Faris, Ernest Watson Burgess, 1928 Methodology of Sociological Research S.

Nowak, 2012-12-06 This is the first part of a textbook for students of sociology and for those students of other social sciences who wish to make use in their work of the research methods elaborated in the course of the development of empirical sociology over the last few decades The development of empirical sociological research in our country and the growing demand both for a practical application of its results and for graduates of sociological studies in various fields of social practice testifies to a much broader trend It is evidence of a desire to base our understanding and conscious transformation of social phenomena on a sound scientific perception of social processes and the mechanisms governing them The increasing volume of studies in Poland is accompanied by a growing need for a particular type of research method namely one in which questions addressed to the sociologist would be answered in a manner as free as possible of conclusions based on impressions and defining as unambiguously as possible both the limits of the generality and the degree of validity of the inferences drawn from the results of the research These conditions are met by the so called standardized methods of investigating social phenomena which together with statistical methods of analyzing collected material constitute the principal means of conducting sociological research in the world today Britain and Terrorism Michael

Dunning, 2021-06-22 Challenging the standard paradigm of terrorism research through the use of Norbert Elias's figurational sociology Michael Dunning explores the development of terrorism in Britain over the past two centuries focusing on long term processes and shifting power dynamics In so doing he demonstrates that terrorism as a concept and designation is entwined with its antithesis civilization A range of process sociological concepts are deployed to tease out the sociogenesis of terrorism as part of Britain's relationships with France Ireland Germany the Soviet Union the industrial working classes its colonies and most recently jihadism In keeping with the figurational tradition Dunning examines the relationships between broad macro level processes and processes at the level of individual psyches showing that terrorism is not merely a thing done to a group but part of a complex web of interdependent relations
