**The European Commission of the Twenty-First Century** Hussein Kassim,John Peterson,Michael W. Bauer,Sara Connolly,Renaud Dehousse,Liesbet Hooghe,Andrew Thompson,2013-06-27 The European Commission is arguably the world s most powerful international administration It plays a central role in the political system

of the European Union The Commission is a permanent presence in the life of the member states but its influence is felt far beyond their borders Viewed historically as the motor of European integration the Commission is the subject of intense controversy It is portrayed frequently as technocratic monolithic and unaccountable but also as fragmented and weakly led According to accepted wisdom it is populated by career bureaucrats who want only to expand the competencies of the Union and therefore their own power This book tests these views It asks Who are the people who work for the organization What are their educational and professional backgrounds What do officials believe about the role of the Commission in the EU today and whether the Union should have more or less power What leads them to choose to pursue a career in the Commission and how do they navigate its complexities How does the Barroso Commission compare to previous Commissions How harmonious are relations between cabinets and the services What has been the impact on the Commission of reform and of the big bang enlargement Co authored by an international team of researchers this book draws on original data from the largest attitudinal survey ever conducted by independent researchers inside the Commission as well as a structured programme of interviews with senior officials It provides an authoritative account of the European Commission of the twenty first century

**The First European** Pierre Briant, 2017-01-02 A truly remarkable forgotten chapter of European intellectual history laid out with passion and integrity The Wall Street Journal The exploits of Alexander the Great were so remarkable that for centuries after his death the Macedonian ruler seemed a figure more of legend than of history Thinkers of the European Enlightenment searching for ancient models to understand contemporary affairs were the first to critically interpret Alexander's achievements As Pierre Briant shows in the minds of eighteenth century intellectuals and philosophers Alexander was the first European a successful creator of empire who opened the door to new sources of trade and scientific knowledge and an enlightened leader who brought the fruits of Western civilization to an oppressed and backward Orient In France Scotland England and Germany Alexander the Great became an important point of reference in discourses from philosophy and history to political economy and geography Voltaire Montesquieu and Robertson asked what lessons Alexander's empire building had to teach modern Europeans They saw the ancient Macedonian as the embodiment of the rational and benevolent Western ruler a historical model to be emulated as Western powers accelerated their colonial expansion into Asia India and the Middle East This important work confirms once more that the life trajectory of the Macedonian conqueror remains an inexhaustible cultural resource Sanjay Subrahmanyam University of California Los Angeles author of *Empires Between Islam and Christianity*

*The First European Elections* Jane P. Sweeney, 2019-07-11 The voice of the spirit of Europe is the European Commission's description of the Community's 434 member Parliament Four years after the European Parliament's historic first direct election by the citizens of nine countries that voice is barely audible and one must pause to wonder whether the spirit is equally weak The European Parliament is potentially one of the most interesting legislative bodies in the world because of the circumstances which created it its unique transnational composition and the power it may some day wield However the gap between the real and the possible is very large indeed

**During the Fifteenth Century** Emma Miriam Lone, 1930 *Iran's First Revolution* Mangol Bayat, 1991 In order to understand Iran's religious revolution of 1978-1979 it is important to look closely at an earlier revolution in the country the constitutional revolution of 1905-1909 This revolution which resulted in the establishment of Iran's first parliamentary democracy was a seminal event in the country's history The most thorough and comprehensive history of the revolution to date Bayat's book examines the uneasy alliance of clerical bureaucratic landowning and mercantile elements that won the support of the masses for a more democratic government especially the clerical dissidents that gave the revolution an aura of religious legitimacy Bayat argues that the recent religious revival in Iran is much less surprising when one sees how constitutionalists at the beginning of the century had to couch their calls for reform in the language of the Koran claiming that political reforms constituted a return to Islam

Juszkiewicz, Jan Rydel, 2021-11-22 The volume focuses on the years following the First World War 1918-1923 when political military cultural social and economic developments consolidated to a high degree in Eastern Europe This period was shaped on the one hand by the efforts to establish an international structure for peace and to set previously oppressed nations on the road to emancipation On the other hand it was also defined by political revisionism and territorial claims as well as a level of political violence that was effectively a continuation of the war in many places albeit under modified conditions Political decision makers sought to protect the emerging nation states from radical political utopias but simultaneously had to rise to the challenges of a social and economic crisis manage the reconstruction of the many extensively devastated landscapes and provide for the social care and support of victims of war

The First European Seminar on Computerised Axial Tomography in Clinical Practice G.H. DuBoulay, I.F. Moseley, 2012-12-06 The publication of proceedings of conferences has often been so delayed that they are useless both to active workers in the field and for currently appropriate teaching Rapid publication on the other hand may impose very difficult conditions upon authors and demand unwelcome sacrifices We wish to thank the many speakers at ESCAT for their co-operation in providing manuscripts and to apologise to those unable for reasons beyond their control to fall in with the rigorous editorial policy To get this book out at the earliest possible moment we have also cut the normal consultation between editors and authors to a minimum One decision made in the interests of uniformity was to replace the various terms used by different writers by one C A T consistent with the title of the Seminar of which the book is a record The organisers of ESCAT decided upon a largely didactic meeting with as little overlap as was practicable between contributions and a determined attempt to view computerised axial tomography in the light of its clinical usefulness As consequence the purpose of this book is to provide a comprehensive introduction to the whole field for clinicians as well as radiologists The editors wish to acknowledge the very efficient help and encouragement of the publishers and the hard secretarial work of Miss G JOHNS as well as the editorial assistance of Dr DEREK KINGSLEY London Spring 1977 G H DU BOULAY I F
