Essays in Analysis Alice Ambrose, 2024-01-15 First published in English in 1966 *Essays in Analysis* addresses the problems in logic and foundations of mathematics metaphysics and epistemology The problems are all root problems in their fields and range from questions concerning our knowledge of the external world to questions about logical entailment mathematical proof and induction Their treatment is not guided by any underlying systematic view as is characteristic in speculative philosophy The unity and

orientation of the collection are instead provided by the method employed throughout the method of analysis A central method of philosophy from Zeno to the present has been analysis of concepts and the guiding idea throughout these essays is that analysis is the only means by which philosophers can bring clarification to their subject The complaint has been made that clarity is not enough but unless it is steadfastly pursued obscurity and confusion are free to pass for profundity As will be evident from even a cursory view reading of these studies all are deeply influenced by Moore and Wittgenstein with whom the author studied for some years at Cambridge university This is an interesting read for scholars and researchers of philosophy

Self Richard Sorabji, 2006-09-14 Richard Sorabji presents a brilliant exploration of the history of our understanding of the self which has remained elusive and mysterious throughout the spectacular development of human knowledge of the outside world He ranges from ancient to contemporary thought Western and Eastern to reveal and assess the insights of a remarkable variety of thinkers He discusses a set of topics which are at the heart of our understanding of ourselves personal identity memory the importance of seeing one's life as a whole the relation between self intellect will and agency self awareness the stream of consciousness embodiment death and survival He rejects the view found in various philosophical and religious writings that the self is an illusion and develops his own original conception of the self as essential to our ownership of our experience and our apprehension of the world

Russian Soviet history and increasingly influential global discourses and practices The result is a new approach to understanding everyday moral experience and the processes by which new moral persons are cultivated
