Sometimes They Froze Wyoming's Economy And Its Banks:

Sometimes the Books Froze Lawrence Milton Woods, 1985 *Asmus Boysen and His Dam Problems* Lawrence Woods, 2013 Danish immigrant Asmus Boysen arrived in New York in 1886 hoping to make his fortune in the free environment of the United States. In a remarkably short time he did just that but a search for coal and metals in Wyoming proved fruitless. He committed his fortune to a dam and power plant to recover his lost investment but a power struggle over the land with lawyer John T. Clarke exhausted both their fortunes. The dam Boysen built is gone but ironically the government made a much larger dam just upriver from Boysen's location naming it Boysen's Dam proving that it made sense to erect a dam and power plant there if the builder was rich enough and powerful enough. *Journal of the West* Lorrin L. Morrison, Carroll Spear Morrison, 2001 **Governor Lady** Teva J. Scheer, 2005-12-14 Governor Lady is the fascinating story of one of the most famous political women of her generation. Nellie Tayloe Ross was elected governor of Wyoming in 1924 just four years after American women won the vote and she went on to be nominated for U.S. vice president in 1928, named vice chairman of the Democratic National Committee the same year and appointed the first female director of the Mint in 1932. Ross launched her career when her husband William Bradford Ross, the preceding governor, died leaving her widowed with four sons and no means of supporting them. She was an ironic choice to be such a pioneer in women's rights since she claimed her entire life that she had no interest in feminism. Nevertheless, she believed in equal opportunity and advancement in merit irrespective of gender, core feminist values. The dichotomy between Ross's career and life choices and her stated priorities of wife and mother is a critical contradiction making her an intriguing woman. Exhaustively researched and powerfully written, *Governor Lady* chronicles the challenges and barriers that a woman with no job experience, higher education or training faced on the way to becoming a confident and effective public administrator. In addition to the discrimination and resentment she faced from some of her male associates, she also aroused the enmity of Eleanor Roosevelt, whom she displaced at the DNC. Born exactly one hundred years after the signing of the Declaration of Independence, Ross lived to celebrate the nation's bicentennial so her long and remarkable life precisely spanned the second U.S. century. She was reared in the Victorian era when upper and middle class women were expected to be domestic, decorative and submissive but she died as the women's movement was creating a multitude of opportunities for young women of the 1970s. Nellie's story will be of great interest to anyone curious about women's history and biography. The contemporary American career woman will especially identify with Ross's struggle to balance her career, family and active personal life. **Annals of Wyoming**, 2017 **Public Waters** Anne MacKinnon, 2021-05-01 Wyoming's colorful story of water management illuminates the powerful forces that impact water use in the rural American West. The state's rich history of managing this valuable natural resource provides insights and lessons for the twenty-first century American West as it faces drought and climate change. *Public Waters* shows how, as popular hopes and dreams meet tough terrain, a central idea that has historically

structured water management can guide water policy for Western states today Drawing on forty years as a journalist with training in water law and economics Anne MacKinnon paints a lively picture of the arcane twists in the notable record of water law in Wyoming She maintains that other Western states should examine how local people control water and that states must draw on historical understandings of water as a public resource to find effective approaches to essential water issues in the West The Oxford History of the American West Clyde A.
