## **Straight Talk About Attitude Research:**

**Straight Talk about Attitude Research** Joseph Chasin,1982      Straight Talk about Attitude Research ,1982

Psychological Processes and Advertising Effects Linda F. Alwitt,Andrew A. Mitchell,2022-02-16 In the 1980s our understanding of how advertising affects consumer behavior was undergoing a dramatic transformation Recent theoretical and methodological advances in cognitive psychology social cognition and artificial intelligence were largely responsible for this transformation These advances provided a better understanding of the information acquisition process and how information is stored in memory Consequently we have been able to incorporate memory the processing of visual information and affect into our models of advertising effects However there were still many unanswered questions Among these are 1 Exactly what is the relationship between the different mediators of persuasion 2 How is memory for advertising related to persuasion 3 What are the theoretical underpinnings of attitude toward the advertisement 4 What determines the effect of persuasion over time 5 What factors affect attention to advertising 6 What psychological processes occur during the watching of a television commercial and 7 What factors affect individual differences in the processing of advertising messages Originally published in 1985 the chapters in this volume provide insights into these questions They are organized in terms of four psychological processes which contribute to our understanding of how advertising works These are affective reactions to advertisements persuasion psychological processes during television viewing and involvement      Measuring Advertising Effectiveness William D. Wells,2014-03-05 This volume includes edited and revised versions of the papers delivered and discussed at the recent Advertising and Consumer Psychology Conference Following the theme of the conference Measuring Advertising Effectiveness the book blends academic psychology marketing theory survey methodology and practical experience while simultaneously addressing the problems and limitations of advertising Acknowledging that advertisements are subtle diverse complex phenomena that require detailed investigation this compilation explores the multidimensional nature of advertising s diverse effects from both academic and applied perspectives Updates on theories and methods along with expert commentaries help to make this a valuable collection that will be of interest to advertising and marketing specialists and communications experts alike      **Issues in Sociology and Social Work Research and**
