Strange Attractors Creating Patterns In Chaosbook And Disk:

Coexistence and Persistence of Strange Attractors Antonio Pumarino,Angel J. Rodriguez,2006-11-13 Although chaotic behaviour had often been observed numerically earlier the first mathematical proof of the existence with positive probability persistence of strange attractors was given by Benedicks and Carleson for the Henon family at the beginning of 1990 s Later Mora and Viana demonstrated that a strange attractor is also persistent in generic one parameter families of diffeomorphisms on a surface which unfolds homoclinic tangency This book is about the persistence of any number of strange attractors in saddle focus connections The coexistence and persistence of any number of strange attractors in a simple three dimensional scenario are proved as well as the fact that infinitely many of them exist simultaneously Coexistence and Persistence of Strange Attractors Antonio Pumarino,Angel J.
