Understanding Adoption Kathleen Hushion, Susan B. Sherman, Diana Siskind, 2006 Adoption is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may help Clinical work with parents and children as well as with adults who were adopted is the focus of Understanding Adoption Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds

On Attachment Ian Rory Owen,2018-03-22 Attachment theory occupies an integrative position between psychodynamic therapy and various perspectives within empirical psychology Since therapy began its way of thinking has been to interpret mental processes in relation to meaningful psychological objects between children and parents partners friends and within individual therapy This volume summarises the research literature relating to attachment theory in developmental psychology in order to clarify conclusions that support practice Part 1 considers the received wisdom about attachment and summarises the literature and what it means for understanding relationships and defences as part of development Part 2 considers attachment in relation to emotional regulations while part 3 applies the clarified understanding of attachment processes to inform assessment and therapy and more broadly mental health work in general The ideas of Sigmund Freud and John Bowlby are used to reinvigorate psychodynamic practice **Development in Infancy** Marc H. Bornstein,Michael E. Lamb,2002-06 This fourth edition of the best selling topically organized introduction to infancy reflects the enormous changes that have occurred in our understanding of infants and their place in human development over the past decade

Mother Media Hannah Zeavin,2025-04-29 An essential history for understanding how we mother now and how motherhood itself became a medium winner of the Brooke Hindle Award from the Society for the History of Technology From the nursery to the prison from the clinic to the commune Mother Media tells the story of how we arrived at our contemporary understanding of what a mother is and how understandings of bad mothering formed our contemporary panics about bad media In this book leading historian of psychology Hannah Zeavin examines twentieth century pediatric psychological

educational industrial and economic norms around mediated mothering and technologized parenting The book charts the crisis of the family across the twentieth century and the many ingenious attempts to remediate nursemaid and mother via speculative technologies and screen media Growing out of her previous award winning book *The Distance Cure* which considered technologized care the book lays bare the contradictions of techno parenting and how it relates to conceptions of maternal fitness medical redlining and surveillance of children parents and other caregivers The author offers narratives of parenting in its extremity for example Shaken Baby Syndrome and its ostensible banality for example the Nanny Cam and how the two are often intertwined Ultimately Zeavin grapples with a simple contradiction technology is seen and judged as harmful in domestic and educational spaces even as it is a saving grace in the unending labor of raising a family [AQA Psychology](#) Michael Eysenck, 2015-04-17 AQA Psychology for AS and A level Year 1 is the definitive textbook for the new 2015 curriculum Written by eminent psychologist Professor Michael Eysenck in collaboration with a team of experienced A level teachers and examiner the book enables students not only to pass their exams with flying colours but also to fully engage with the science of psychology As well as covering the six core topics students will study the book includes Activities which test concepts or hypotheses bringing theory to life Key research studies explained and explored showing the basis on which theory has developed Case studies which show how people's lives are affected by psychological phenomena Evaluation boxes which critically appraise key concepts and theories Self assessment questions which encourage students to reflect on what they've learnt Section summaries to support the understanding of specific ideas perfect for revision Exam hints which steer students towards complete and balanced answers Key terms defined throughout so students aren't confused by new language 200 figures tables and photos End of chapter further reading to enable students to develop a deeper understanding End of chapter revision questions and sample exam papers to consolidate knowledge and practice exam technique A full companion website with a range of further resources for both students and teachers including revision aids and class materials Incorporating greater coverage of research methods as well as key statistical techniques the sixth edition of this well loved textbook continues to be the perfect introduction to psychology Accessible yet rigorous the book is the ideal textbook for students taking either the AS course or year 1 of the A level **Crossing Boundaries** Lynda Birke, Jo Hockenfull, 2012-08-14 Many people feel strong bonds with nonhuman animals and these relationships are central to much emerging scholarship in human animal studies Yet to study relationships is not straightforward research often focuses on how humans affect animals or vice versa rather than on the relationships themselves Partly this is a consequence of the history of disciplinary divisions particularly between natural and social sciences In this book contributors from a wide range of disciplinary backgrounds reflect on the methodological challenges they face and how they go about studying relationships between people and animals The book provides fascinating insights into how research on human animal relationships can rise to the challenges of interdisciplinarity and help us to understand the animals with whom we bond *Emotion* ,
