Stranger In The Nest:

Stranger in the Nest David B. Cohen, 1999-02-26 A gripping account that provides solid answers to the age old question of nature vs nurture Providing scientifically grounded support for the thesis advanced in Judith Rich Harris controversial book *The Nurture Assumption* psychologist David Cohen explains why children s aptitudes and interests depend more on genes than parenting Drawing on two decades of research in behavioral genetics to support this provocative perspective Dr Cohen puts a human face on the age old nature vs nurture debate Children are not born as blank slates he argues and he goes on to reveal new research indicating that DNA rather than parents determines to a significant extent how children think feel and behave This riveting book uses vivid analogies to illuminate complex genetics research and explains why parental influence may have far less impact than is normally thought A surprising account of how our personality traits and behaviors are determined more by nature than nurture

Ants, Bees, and Wasps John Lubbock, 2001-09 A pioneering work on the social insects with considerable detail including formation and maintenance of nests relation of ants to plants and animals behavior recognition of friends power of communications senses intelligence etc with most of the work related to ants
