Strategic Energy Policy Challenges For The 21st Century Independent Task Force Report:

Strategic Energy Policy Edward L. Morse, 2001 *Strategic Energy Policy* Edward L. Morse, Amy Jaffe, Council on Foreign Relations, 2001 For many decades the United States has been able to avoid adopting a comprehensive energy security policy Today however the United States faces the prospect of unprecedented energy price volatility and recurrent shortages of electricity and other energy supplies As a result energy policy is now one of the most compelling requirements of public policy A comprehensive national energy security policy is necessary to assure continued improvement in U S living standards in the 21st century The world has shifted from a situation of sustained surplus capacities to one of capacity limits and complacency has shackled the United States as a prisoner of the energy dilemma Reacting to each crisis as it appears on the horizon the United States has failed to promote a long range strategic policy As a result the country is now vulnerable to oil supply disruptions even worse than those of the 1970s and to the risks that supply disruptions and price volatility can have on domestic industry The United States faces a major challenge to create a coherent and comprehensive energy policy that accommodates and coordinates where possible domestic and foreign policy priorities and objectives in an effective manner In this context the James A Baker III Institute for Public Policy and the Council on Foreign Relations cosponsored an Independent Task Force to contribute to the goal of defining a strategic U S energy policy The published report of this Task Force defines the energy problems facing the United States and outlines findings and recommendations for the creation of a strategic energy initiative The Task Force Report balances rising world energy requirements energy infrastructure constraints environmental concerns and domestic energy use challenges in a pragmatic way and discusses in detail options and trade offs for near term policy actions and long term initiatives BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **U.S. Strategy for Pakistan and Afghanistan** Richard Lee Armitage, Samuel R. Berger, Daniel Seth Markey, 2010 The Council on Foreign Relations sponsors Independent Task Forces to assess issues of current and critical importance to U S foreign policy and provide policymakers with concrete judgments and recommendations Diverse in backgrounds and perspectives Task Force members aim to reach a meaningful consensus on policy through private and non partisan deliberations Once launched Task Forces are independent of CFR and solely responsible for the content of their reports Task Force members are asked to join a consensus signifying that they endorse the general policy thrust and judgments reached by the group though not necessarily every finding and recommendation Each Task Force member also has the option of putting forward an additional or a dissenting view Members affiliations are listed for identification purposes only and do not imply institutional endorsement Task Force observers participate in discussions but are not asked to join the consensus Book Jacket *U.S. Nuclear Weapons Policy* William James Perry, Brent Scowcroft, Charles D. Ferguson, 2009 The report notes that in the near term nuclear weapons will remain a fundamental element of U S national security For this reason it emphasizes the importance of maintaining a safe secure and reliable

deterrent nuclear force and makes recommendations on this front The report also offers measures to advance important goals such as preventing nuclear terrorism and bolstering the nuclear nonproliferation regime Foreword U.S. Trade and Investment Policy Andrew H. Card, Edward H. Alden, Council on Foreign Relations, Matthew Jon Slaughter, 2011 From American master Ward Just returning to his trademark territory of Forgetfulness and The Weather in Berlin an evocative portrait of diplomacy and desire set against the backdrop of America's first lost war Energy Security Challenges for the 21st Century Gal Luft, Anne Korin, 2009-08-10 The impact of energy on global security and economy is clear and profound and this is why in recent years energy security has become a source of concern to most countries However energy security means different things to different countries based on their geographic location their endowment of resources their strategic and economic conditions In this book Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system maritime security the role of multinationals and non state actors in energy security the pathways to energy security through diversification of sources and the development of alternative energy sources It delves into the various approaches selected producers consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework It also explores the future of nuclear power the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security **U.S. Immigration Policy** Council on Foreign Relations. Independent Task Force on U.S. Immigration Policy, Jeb Bush, Thomas F. McLarty, Edward H. Alden, 2009 The Council on Foreign Relations sponsors Independent Task Forces to assess issues of current and critical importance to U S foreign policy and provide policy makers with concrete judgments and recommendations Diverse in backgrounds and perspectives Task Force members aim to reach a meaningful consensus on policy through private and nonpartisan deliberations Once launched Task Forces are independent of CFR and solely responsible for the content of their reports Task Force members are asked to join a consensus signifying that they endorse the general policy thrust and judgments reached by the group though not necessarily every finding and recommendation Each Task Force member also has the option of putting forward an additional or dissenting view Members affiliations are listed for identification purposes only and do not imply institutional endorsement Task Force observers participate in discussions but are not asked to join the consensus Book jacket *North America* Council on Foreign Relations, 2014-10-01 This CFR sponsored Independent Task Force report North America Time for a New Focus asserts that elevating and prioritizing the U S Canada Mexico relationship offers the best opportunity for strengthening the United States and its place in the world **Arctic Imperatives** Thad W. Allen, Christine

Todd Whitman, Esther Brimmer, Anya Schmemmann, 2017-03-01 **U.S. Policy Toward the Korean Peninsula** Charles L. Pritchard, John H. Tilelli, Scott Snyder, 2010 This Task Force report comprehensively reviews the situation on the peninsula as well as the options for U S policy It provides a valuable ranking of U S interests and calls for a firm commitment from the Obama administration to seek denuclearization of the Korean peninsula backed by a combination of sanctions incentives and sustained political pressure in addition to increased efforts to contain proliferation It notes that China s participation in this effort is vital Indeed the report makes clear that any hope of North Korea s dismantling its nuclear program rests on China s willingness to take a strong stance For denuclearization to proceed China must acknowledge that the long term hazard of a nuclear Korea is more perilous to it and the region than the short term risk of instability The report also recognizes that robust relations between Washington and its allies in the region Japan and South Korea must underpin any efforts to deal with the North Korean problem It looks as well at regime change and scenarios that could lead to reunification of the peninsula At the same time that the Task Force emphasizes the danger and urgency of North Korea s behavior it recognizes and applauds the beneficial U S relationship with South Korea which has proved to be a valuable economic and strategic partner In this vein the Task Force advocates continued close coordination with Seoul and urges prompt congressional passage of the U S South Korea free trade agreement **America and the New American Century** Chris

Wogan, 2004-10-10 The explosive new book exposing the hidden history behind America s War on Terror and the unnerving secrets of the Bush administration This book reveals the truth behind the neoconservative hijacking of American foreign policy and the shocking details of the Bush administration and its War on Terror As one of the most comprehensive books on America s War on Terror and the history leading up to this perpetual war America and the New American Century will open your eyes and change the way you see the world around you Be sure to check out [www AmIraqa com](http://www.AmIraqa.com) to take a sneak peak of the book and to find supporting files documentation sources and other information This version of the book is cheaper because it doesn t contain the dozens of pages of sources The sources are available for review at [www amiraqa com](http://www.amiraqa.com)

Defending an Open, Global, Secure, and Resilient Internet Council on Foreign Relations, 2013-06-01 The CFR sponsored Independent Task Force report Defending an Open Global Secure and Resilient Internet finds that as more people and services become interconnected and dependent on the Internet societies are becoming increasingly vulnerable to cyberattacks To support security innovation growth and the free flow of information the Task Force recommends that the United States and its partners work to build a cyber alliance make the free flow of information a part of all future trade agreements and articulate an inclusive and robust vision of Internet governance **The Emerging Global Health Crisis** Council on Foreign Relations, 2014-12-01 Rates of heart disease cancer diabetes and other noncommunicable diseases NCDs in low and middle income countries are increasing faster in younger people and with worse outcomes than in wealthier countries In 2013 alone NCDs killed eight million people before their sixtieth birthdays in developing countries A new CFR

sponsored Independent Task Force report and accompanying interactive look at the factors behind this epidemic and the ways the United States can best fight it U.S. Education Reform and National Security Joel I. Klein, Condoleezza Rice, Julia Levy, 2014-05-14 The United States failure to educate its students leaves them unprepared to compete and threatens the country's ability to thrive in a global economy and maintain its leadership role This report notes that while the United States invests more in K 12 public education than many other developed countries its students are ill prepared to compete with their global peers According to the results of the 2009 Program for International Student Assessment PISA an international assessment that measures the performance of 15 year olds in reading mathematics and science every three years U S students rank fourteenth in reading twenty fifth in math and seventeenth in science compared to students in other industrialized countries The lack of preparedness poses threats on five national security fronts economic growth and competitiveness physical safety intellectual property U S global awareness and U S unity and cohesion says the report Too many young people are not employable in an increasingly high skilled and global economy and too many are not qualified to join the military because they are physically unfit have criminal records or have an inadequate level of education The report proposes three overarching policy recommendations implement educational expectations and assessments in subjects vital to protecting national security make structural changes to provide students with good choices and launch a national security readiness audit to hold schools and policymakers accountable for results and to raise public awareness **A Sharper Choice on North Korea** Mike Mullen, Sam Nunn, Adam Mount, 2016-09-01 *Global Brazil and U.S.-Brazil Relations* Council on Foreign Relations. Independent Task Force on Brazil, Samuel W. Bodman, Julia Sweig, James D. Wolfensohn, 2011 July 12 2011 Over the course of a generation Brazil has emerged as both a driver of growth in South America and as an active force in world politics A new Council on Foreign Relations CFR sponsored Independent Task Force report asserts that it is in the interest of the United States to understand Brazil as a complex international actor whose influence on the defining global issues of the day is only likely to increase Brazil currently ranks as the world's fifth largest landmass fifth largest population and expects to soon be ranked the fifth largest economy The report *Global Brazil and U S Brazil Relations* recommends that U S policymakers recognize Brazil's standing as a global actor treat its emergence as an opportunity for the United States and work with Brazil to develop complementary policies The Task Force is chaired by former secretary of energy Samuel W Bodman and former president of the World Bank James D Wolfensohn and directed by CFR Senior Fellow and Director for Latin America Studies and Director of the Global Brazil Initiative Julia E Sweig Recognizing Brazil's global role the report recommends that the Obama administration now fully endorse the country's bid for a seat as a permanent member of the United Nations Security Council UNSC It argues that a formal endorsement from the United States for Brazil would go far to overcome lingering suspicion within the Brazilian government that the U S commitment to a mature relationship between equals is largely rhetorical Domestically Brazil's inclusive growth has translated into a significant

reduction of inequality an expansion of the middle class and a vibrant economy all framed within a democratic context. Consequently Brazil has been able to use its economic bona fides to leverage a stronger position in the international commercial and diplomatic arena. The report stresses the importance of regular communication between the presidents of both countries. Cooperation between the United States and Brazil holds too much promise for miscommunication or inevitable disagreements to stand in the way of potential gains. A mature working relationship means that the United States and Brazil can help each other advance mutual interests even without wholesale policy agreements between the two notes the report. The Task Force further recommends that the U S Congress include an elimination of the ethanol tariff in any bill regarding reform to the ethanol and biofuel tax credit regime the United States take the first step to waive visa requirements for Brazilians by immediately reviewing Brazil s criteria for participation in the Visa Waiver Program the U S State Department create an Office for Brazilian Affairs and the National Security Council NSC centralize its efforts under a NSC director for Brazil in order to better coordinate the current decentralized U S policy. The bipartisan Task Force includes thirty distinguished experts on Brazil who represent a range of perspectives and backgrounds. The report includes a number of additional views by Task Force members including one that notes We believe that a more gradual approach regarding Brazil s inclusion as a full UNSC member would likely have more success in navigating the diplomatic complexities presented by U S support for Brazil. Another view asserts If the United States supports as the Obama administration has said it does leadership structures in international institutions that are more reflective of international realities it must support without qualifications Brazil s candidacy for the UNSC.

U.S.-Turkey Relations Madeline Albright, Steven Cook, Stephen Hadley, Senior Fellow Steven A Cook, 2012-05 Turkey is a rising regional and global power facing as is the United States the challenges of political transitions in the Middle East bloodshed in Syria and Iran s pursuit of nuclear weapons. As a result it is incumbent upon the leaders of the United States and Turkey to define a new partnership in order to make a strategic relationship a reality says a new Council on Foreign Relations CFR sponsored Independent Task Force.

Working With a Rising India Charles R. Kaye, Joseph S. Nye Jr., Alyssa Ayres, 2015-11-01 India now matters to U S interests in virtually every dimension. This CFR sponsored Independent Task Force report directed by Alyssa Ayres assesses the current situation in India and the U S India relationship and suggests a new model for partnership with a rising India.

New Security Frontiers Sai Felicia Krishna-Hensel, 2016-04-29 The globalizing world is increasingly confronting a new category of security issues related to resource availability. The resource environment contains both traditional categories such as energy foodstuffs and water as well as new technologically related resources such as rare earth minerals. The essays in this volume emphasize both the uniqueness and the magnitude of these new challenges while simultaneously acknowledging that cooperation and competition in response to these security concerns occur within the context of both the historical and contemporary international power configurations. Moreover these challenges are of a global nature and will require global perspectives.

global thinking and innovative global solutions Krishna Hensel brings together a wide range of topics focusing on critical resource availability impacting upon global security and the geopolitical ramifications of resource competition The volume addresses the development of strategic thinking on these issues and underscores the increasing awareness that this is a critical area of concern in the twenty first century global landscape The End of Oil Paul Roberts,2005-04-05 A stunning piece of work perhaps the best single book ever produced about our energy economy and its environmental implications Bill McHibbon The New York Review of Books Petroleum is so deeply entrenched in our economy politics and daily lives that even modest efforts to phase it out are fought tooth and nail Companies and governments depend on oil revenues Developing nations see oil as their only means to industrial success And the Western middle class refuses to modify its energy dependent lifestyle But even by conservative estimates we will have burned through most of the world s accessible oil within mere decades What will we use in its place to maintain a global economy and political system that are entirely reliant on cheap readily available energy In The End of Oil journalist Paul Roberts talks to both oil optimists and pessimists around the world He delves deep into the economics and politics considers the promises and pitfalls of oil alternatives and shows that even though the world energy system has begun its epochal transition we need to take a more proactive stance to avoid catastrophic disruption and dislocation
