## **Strategic Alliances As Social Facts Business Biotechnology And Intellectual History:**

*Strategic Alliances as Social Facts* Mark De Rond, 2003-06-19 How can we explain a proliferation of alliances when the probability of failure is higher than success And why have we emphasized their order manageability and predictability whilst acknowledging that they tend to be experienced as messy politically charged and unpredictable Mark de Rond in this provocative book sets out to address such paradoxes Based on in depth case studies of three major biotechnology alliances he suggests that we need theories to explain idiosyncrasy as well as social order He argues that such theories must allow for social conduct to be active and self directed but simultaneously inert and constrained thus permitting voluntarism determinism and serendipity alike to explain causation in alliance life The book offers a highly original combination of insights from social theory and intellectual history with more mainstream strategic management and organizations literature It is a refreshing and thought provoking analysis that will appeal to practitioner and academic researcher alike

*Cooperative Strategy* John Child, David Faulkner, Stephen B. Tallman, Linda Hsieh, 2019 This new edition of Cooperative Strategy provides a comprehensive view of the practical and theoretical literature concerning cooperative strategies and the alliance and network organizational forms that are the enablers of these strategies **Collaborators Collaborating**

Monica Konrad, 2012 As bio capital in the form of medical knowledge skills and investments moves with greater frequency from its origin in First World industrialized settings to resource poor communities with weak or little infrastructure countries with emerging economies are starting to expand new indigenous science bases of their own The case studies here from the UK West Africa Sri Lanka Papua New Guinea Latin America and elsewhere explore the forms of collaborative knowledge relations in play and the effects of ethics review and legal systems on local communities and also demonstrate how anthropologically informed insights may hope to influence key policy debates Questions of governance in science and technology as well as ethical issues related to bio innovation are increasingly being featured as topics of complex resourcing and international debate and this volume is a much needed resource for interdisciplinary practitioners and specialists in medical anthropology social theory corporate ethics science and technology studies **Reimagining Business History**

Philip Scranton, Patrick Fridenson, 2013-04-15 A vigorous call for rethinking the field of business history Business history needs a shake up Philip Scranton and Patrick Fridenson argue as many businesses go global and cultural contexts become critical Reimagining Business History prods practitioners to take new approaches to entrepreneurial intentions company scale corporate strategies local infrastructure employee well being use of resources and long term environmental consequences During the past half century the history of American business became an unusually active and rewarding field of scholarship partly because of the primacy of postwar American capital at home and abroad and the rise of a consumer culture but also because of the theoretical originality of Alfred D Chandler In a field long given over to banal company histories and biographies of tycoons Chandler took the subject seriously enough to ask about the large patterns and causes of

corporate success Chandler and his students found the richest material for theorizing about the course of business history in large companies and their institutional structures and cultures Meantime Scranton and others found smaller firms those specializing in batch work as opposed to mass produced goods far closer to the norm and more telling Scranton and Fridenson believe that the time has come for a sweeping rethinking of the field its materials and the kinds of questions its practitioners should be asking How can this field develop in an age of global markets growing information technology and diminishing resources A transnational collaboration between two senior scholars Reimagining Business History offers direction in forty four short pithy essays      Collaboration and Governance in the Emergency Services Paresh

Wankhade,Swetketu Patnaik,2019-07-19 Globally emergency services are witnessing a period of unprecedented uncertainty and change caused by pressure on their budgets reduced manpower and changing patterns of demand and service delivery Such challenges are also having huge implications on the workforce health and wellbeing This book is a timely well researched addition to improve our understanding of the governance and collaboration issues in the emergency services Steve McGuirk Chairman Warrington and Halton Hospitals Trust Former Chief Fire Officer and CEO Greater Manchester Fire and Rescue Service Good governance collaboration and sound leadership are easy qualities to take for granted in the Emergency Services However given the increasing complexity of the challenging political and operational environments these organisations work in it is not reasonable to assume these qualities will always emerge as a natural phenomenon This book is a welcome addition that provides invaluable evidence based insights for leaders who are seeking to raise the quality of their services for both the public and their workforce alike Andy Newton Immediate Past Chair College of Paramedics and Former Paramedic Director South East Coast Ambulance Service NHS Trust SECamb This unique text provides fresh insights and understanding of the governance and collaboration issues between emergency services in a dynamic policy and organisational environment in a global world The book offers critical insights into the theory and rationale behind the interoperability and collaboration between the emergency services and examines in detail important themes around trust leadership workforce wellbeing and resilience and professional culture s each having great significance for the success of the interoperability and governance agenda The chapters cover new materials including the research conducted by the authors and are written in a style that is easily accessible This book caters to a wide audience of researchers academics students emergency services staff leaders and public managers both in the UK and internationally      **The Oxford Handbook of Organizational Paradox** Wendy K. Smith,Marianne W. Lewis,Paula Jarzabkowski,Ann Langley,2017-09-07 The notion of paradox dates back to ancient philosophy yet only recently have scholars started to explore this idea in organizational phenomena Two decades ago a handful of provocative theorists urged researchers to take seriously the study of paradox and thereby deepen our understanding of plurality tensions and contradictions in organizational life Studies of organizational paradox have grown exponentially over the past two decades canvassing varied phenomena methods and levels of analysis

These studies have explored such tensions as today and tomorrow global integration and local distinctions collaboration and competition self and others mission and markets Yet even with both the depth and breadth of interest in organizational paradoxes key issues around definitions and application remain This Handbook seeks to aid engage and fuel the expanding interest in organizational paradox Contributions to this volume depict how paradox studies inform and are informed by other theoretical perspectives while creating a resource that enables scholars to learn about and apply this lens across varied organizational phenomena The increasing complexity volatility and ambiguity in our world continually surfaces paradoxical dynamics Thus this Handbook offers insights to scholars across organizational theory

**Trading Places--SMEs in the Global Economy** Lester Lloyd-Reason, Leigh Sear, 2007-01-01 There are 18 contributions in the book all of whom are very highly regarded in the fields of entrepreneurship and international management the book is well researched and edited The book provides an excellent discussion on the importance of SMEs in the global economy Through a number of different case study examples and discussion of various elements of the internationalization process this book provides an outstanding resource for the study of SMEs that operate in the international market Vanessa Ratten Journal of International Entrepreneurship This book is most timely It arrives at a time when globalisation and new technologies present major opportunities and challenges to the role of the independent small and medium sized business in economies The book s strength in dealing with many of the emerging issues is underpinned by a truly international range of contributors with a strong mix of practical as well as academic experience From the preface by Allan Gibb Professor Emeritus Durham University UK Lester Lloyd Reason and Leigh Sear bring together leading researchers and thinkers in this critical guide to the ongoing worldwide research shaping the role played by SMEs within today s global economy The expert contributors contend that the past twenty years have seen an explosion in research into international SMEs resulting in a considerable body of academic literature and thinking This research they argue may merely serve to increase our lack of understanding in this area and often results in myths and misconceptions upon which SME policies and support programmes have been developed and introduced They go on to suggest that academic models are often poorly suited to the problems faced by SMEs within the international trading environment In many instances the contributors find SMEs at the vanguard of the challenge to accepted business practices it is these challenges that underpin the text Illustrating that today s SMEs are faced with the critical issue of how to create and maintain a sustainable competitive advantage in light of the increased complexity of international trade and global business linkages this Handbook will prove invaluable to both academics and practitioners involved in business and management and entrepreneurship
