Perplexities of Consciousness Eric Schwitzgebel, 2011-01-28 A philosopher argues that we know little about our own inner lives Do you dream in color If you answer Yes how can you be sure Before you recount your vivid memory of a dream featuring all the colors of the rainbow consider that in the 1950s researchers found that most people reported dreaming in black and white In the 1960s when most movies were in color and more people had color television sets the vast majority of reported dreams contained color The most likely explanation for this according to the philosopher Eric Schwitzgebel is not that exposure to black and white media made people misremember their dreams It is that we simply don't know whether or not we dream in color In Perplexities of Consciousness Schwitzgebel examines various aspects of inner life dreams mental imagery emotions and other subjective phenomena and argues that we know very little about our stream of conscious experience Drawing broadly from historical and recent philosophy and psychology to examine such topics as visual perspective and the unreliability of introspection Schwitzgebel finds us singularly inept in our judgments about conscious experience

The Transformation of Positivism David F. Lindenfeld, 2023-11-10 European intellectual history of the late 19th and early 20th centuries presents a picture of extraordinary creative richness Many historians have looked at this period as one of a revolt against positivism in the attempts of thinkers such as Freud Weber Dilthey and Durkheim to encompass and submit to strict investigation the irrational aspects of human behavior At the same time however other thinkers such as Russell Frege Husserl Wittgenstein and Meinong were seeking to revise and expand the notion of reason itself through investigation of language and its relation to logic and psychology this trend might be seen as a revolt within positivism David Lindenfeld shows that these two trends were integrally related in the thought of the Austrian philosopher Alexius Meinong and that he was representative of the major trends of the age Meinong played a role in several intellectual movements which are now thought of as distinct He like Husserl studied under the philosopher Franz Brentano whose ideas inspired the phenomenological movement In addition however Meinong exerted a decisive influence on Bertrand Russell in the early 1900s and thus also figures prominently in the history of British analytical philosophy Furthermore he developed a theory of values and their meaning which dealt with

many of the issues raised by German social philosophers such as Weber and Dilthey Finally Meinong has an acknowledged place in the history of psychology where he is cited as a precursor of the Gestalt psychology of Wertheimer Kohler and Koffka The first part of *The Transformation of Positivism* locates the background of Meinong's thought in the long run traditions of British empiricism as well as in the political and social conditions of Austria in the late 19th century The second part traces Meinong's intellectual development as he participated in the movement away from psychologism the tendency to reduce all philosophical and social questions to psychological ones After 1900 Meinong moved to a new concern with language and semantics culminating in his theory of objects The third part shows how positivism experimental psychology and phenomenology developed away from Meinong's concepts to emerge as distinct even opposed by the 1920's This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980

Meaning, Expression and Thought Wayne A. Davis, 2002-11-11 This philosophical treatise on the foundations of semantics is a systematic effort to clarify deepen and defend the classical doctrine that words are conventional signs of mental states principally thoughts and ideas and that meaning consists in their expression This expression theory of meaning is developed by carrying out the Gricean programme explaining what it is for words to have meaning in terms of speaker meaning and what it is for a speaker to mean something in terms of intention But Grice's own formulations are rejected and alternatives developed The foundations of the expression theory are explored at length and the author develops the theory of thought as a fundamental cognitive phenomenon distinct from belief and desire argues for the thesis that thoughts have parts and identifies ideas or concepts with parts of thoughts This book will appeal to students and professionals interested in the philosophy of language
